Kings Cultural Institute / Creative Futures Programme

Outline Vision : “Our (primary) school is at the Museum....”

with supporting papers.

Working Document March 2013
Garbers & James

Rev C : December 2014

Contents:

1.0. Introduction

2.0. Outline Vision Statement

2.1. Primary Curricular keynote thoughts

2.2. Museum/Primary building fabric

3.0. Activities : Consultation; Information Gathering & Sharing

3.1. Notes from first meeting with Dorian Hayes 14th Feb 2013

Ideas Lab Event : Rethinking Access and Diversity in Research,Cultural Policy and Creative Practice
- Personal notes from Ideas Lab 01.03.13

3.2. Institute of Education : Meeting with John Reeve
- Personal notes from session, 07.03.13

3.3. KCL : Meeting with Dr Anwar Tlili; Dr Jennifer Dewitt and Dorian Hayes 18.03.13

3.4. NLA Conference "London's School Building Crisis: Filling the 90,000 gap"
- Personal notes from conference 26.03.13

3.5. Notes from WJ meeting with David Anderson, Dir. Gen. NMW; President of Museums Association held 01.12.14

4.0. Learning Methods : The Qualities of Museum Experience and Potential for Learning

- *"Upside Down" children first*
- *"Inside Out"*
  - *relay worldwide museums to other children!*
  - *cinema for all (eg. Phil Grabsky; Seventh Art Productions)*
  - *Khan Academy?*
  - *layers of experience / magnifying glass*
- *App : the personal connections to an individual object; family history meets global history. The intersection*
- *Haptic technologies; communication; perception etc.*
- *Image : learning through image alone; Visual Thinking Strategies*

5.0. Museum Learning : Current Best Practice Projects

5.1. "Discover" at Stratford

5.2. Pitt Rivers Museum, Oxford

5.3. The Herbert, Coventry

6.0. Related Existing Projects (visits and analysis)

6.1. NYC Museum School

6.2. Museum Schools programme, Bhopal

6.3. Langley Academy etc.

Appendices:

Appendix A : Primary Shortages

Appendix B : Basic Need Funding Allocation to LAs 2012

Appendix C : LGA Delays condemn children to studying in crumbling schools (12.03.13)

Appendix D : Record of attendants/contacts at the Ideas Lab session 01.03.13

Appendix E : WJ CV

Appendix F : Lists of Free Schools open in UK (2011 & 2012)

Appendix G : Thoughts & Inspirations

Appendix H : WJ Notes on KCL Form

Appendix I : Local Authority/Museums Contact Table (work in progress)

Appendix J : Formal Notes from all sessions 1st March 2013

Appendix K : Papers / references from John Reeve

Appendix L : NLA Presentations 26/03/13

Appendix M : *Learning Methods*

Appendix N : Norfolk Teaching Museum Vacancy Ad

1.0. Introduction

1.0. Introduction:

For the last seven years I have had my own architectural practice specialising in public cultural projects, with Clients most notably including Tate Modern and Salisbury Cathedral. Prior to that I have worked internationally, nationally and regionally in both public and private sector, also very often with Schools, Universities and Museums; (refer personal cv , Appendix E) and my practice link www.garbersjames.com.
So, now, after many years of architectural practice I have come to the great conclusion that my principal interests are indeed museums and education; more specifically I have been developing an idea for quite a while, and want to find a way of taking it further:

It is simply that I believe that it could be a really good idea to site (some) primary schools at, or directly attached to, museums.

My principal reason for this is that I think there would be a tremendous opportunity for children, in such a symbiotic location, to be able to absorb local collections almost by osmosis; a constant weave of reference across the curriculum. This would be a fundamentally different experience, qualitatively, from simply visiting, however inspiring school or family trips clearly are.

But there seem to be so many other reasons for doing this. Here are just a few, to give you a flavour of my thoughts, and in no particular order:

- Cultural Continuity/Identity/Citizenship; an understanding of what it is to know "our" local/regional/national collections and where that particular school and children sit relative to it.
- a clear setting-to-rights of issues of exclusion in museums or cultural heritage
- making a museum just part of all local (catchment area) children's daily life (and their families')
- inspiring making and creativity; clearly digital information is so important today, but the physical knowledge embedded within objects has phenomenal depths across all subjects. Bring the objects to life and counter (or add to ...) the digital head world with the tactile material world in arts, sciences and humanities.
- the ability to look backwards, seek inspiration and project forwards along axes suggested by the collections' parameters. Where do I come from? Where am I going to? The values of the local community across time.
- Facilities:- there are many common elements in the physical fabric between museums and schools
  cloakrooms, toilets, eating places some classrooms (already!) larger gathering spaces security, heat, light etc

A working title might include "MAKE(-ing)" schools - Museums As *Knowledgable* **Environments,** viz. as opposed to (just...) places of *Information*

We understand there is currently a grave shortage of primary school places (refer Appendices A & C): many museums could, with some relatively simple re-ordering or extension readily provide fit for purpose accommodation, representing good capital cost value for money and onward sharing of the running costs. I have delivered quite a few primary schemes in the past and feel that the accommodation requirements could be flexibly inspired by various museum properties. They could all be significantly different in an inspiring and intriguing way, whilst retaining some clearly required common denominators in the provision of facilities. (*NB: I do however think that secondary accommodation would be too much of a push, but having been steeped in such an environment as a primary child, I think that secondary visits or partnership schools would then have a great foundation on which to continue to build.*

I personally can see such a rich field of application in city, regional or rural areas. Ideally I would like to find 2 or 3 museum and school partnerships (eg London; a regional city; a rural location...) and trial the idea.

Clearly I am a practitioner and have not been an academic to date, although I have always done quite a lot of teaching or mentoring of one sort or another (I have contributed sessions on the Tate / King's College "Towards Tomorrow's Museum" course over the last few years)

I have looked at some other, partly related, projects:

- Museum Schools in US including include San Diego, Avondale and NYC, where there seems to be a great emphasis on partnership and a far greater number of museum visits
- The Museum Schools programme, Bhopal, India seems to be a wonderful idea where museums simply opens their doors for street kids who can treat it like school. they will always be offered instruction, but just as and when they can overcome other pressures in life to attend.
- In the UK there is Langley Academy, Slough which also emphasises Museum learning (on a separate site and for secondary students)

None of these are exactly what I am thinking of though .....

2.0. Outline Vision Statement

2.0. DRAFT : Outline Vision Statement, for discussion purposes

Working Title : "Our (primary) school is at the Museum..."

2.1. Content:

In this school, life follows all the norms of best practice primary education and the regular core curriculum.

But... every subject or topic would, at some point in the school year, be founded in or related to an object, or selection of objects, from the museum collection. For example, using the core curriculum subjects: *(note: alphabetical illustration by an architect not a teacher!)*

- *Access Issues:*
  Are there any friends and colleagues who cannot physically join in with all of our lessons and activities in school and in the museum spaces without some extra support? How can we make it comfortable and fun for them too, so that we're all able to share our experiences in this school, equally?

- *Art & Design*
  Can we draw, paint, print, sculpt, photograph.... the objects?
  How does the object look in different colour, light material? Was it designed? Can we design a range inspired by the object? Maybe to sell in the museum shop?...

- *Citizenship*
  Did children associated with the objects in the collection have the same rights as we now have? Did their mothers and fathers or sisters and brothers? How did everyone help each other at that time? How do we do that now? How is our school organised in the place that we live? How will it be, when my children come to primary school?

- *Design & Technology*
  What were the available contemporary technologies? What was the function of the object? How do we deal with that function today?How does one design such an object in 2012; how will we in 2050?

- *English / Foreign Language*
  "every object has a story"; there will be innumerable opportunities to look at contemporary writings as well as inspiration for creative writing. Where do the objects come from?... maybe other lands; other languages?...

- *Geography*
  Where do all the objects come from? What culture do they represent? What is that country or other area of the country like: the people? the topography? the nature? the production of the object? If the object is from another part of the world, why is it here?

- *History*
  Where does this museum or collection sit in our cultural history locally, regionally, nationally, internationally? Who were the characters associated with the objects? What has been the effect of their lives on ours?

- *ICT*

How does the museum record the collection? How does it relay information to children who don't go to school next door? How can the meaning of the collection be analysed? Can we get as close to our museum "virtually" to other museums all around the world?

- *Mathematics*
  Collections generate numbers, statistics, weights, geometries, proportions and more.....

- *Music*
  Are there any musical objects or sounds associated with the collection? Are there songs about the people or times explained in the museum? How does the museum sound? Can we give a concert using music and costumes from a period described by the collection?

- *Personal Social and Health Education*
  Does the collection represent a different historical time or place? If I lived then and there, how would I have been looked after? How would I have learned and developed? What did I eat? How did I rest and play? How will my children find these aspects of life in twenty years time, or so?

- *Physical Education*
  How can we keep healthy and fit in this school? Is it different from past children here? Why is it important for the future children? How can we organise indoor and outdoor games and sports to be fun for us all?

- *Religious Education*
  How many religions or beliefs are represented by objects or people associated with the Collections? What are those beliefs? Do we hold them all today? What are the functions of those beliefs? Do we have current alternative ways of providing those functions?

- *Science*
  The science of materials; the physics of structures; the nature of specimens; the chemistry of the fabric or its geological extraction. Scientific attributes as well as the history of science will be there.

The objects, their stories and the children's close involvement with the collection will create a cultural weave; a rich and robust fabric that is unique to that school. Although every school has a common element of curriculum, each museum school will have unique qualities over and above that.

Cultural continuity, a strong sense of belonging and communal experience as local junior citizens with continuation of what has gone before and what is set to come in the future can be explored.
Social and material values can be relatively defined. The children would learn from objects and consider how will their conclusions differ from their grandparents', parents' and children's thoughts to come?

2.2. Accommodation and Operations

Primary Schools and Museums share many common functional requirements

- assembly place
  - for the school, this involves the whole school coming together as one body
  - for the museum, for group visits and events
- refreshments
  - the school needs lunch facilities
  - the museum needs public refreshments and catering for events
- toilets
- cloakrooms
- classrooms
  - typically a museum will have some classroom/seminar facilities. Clearly a school will need more....
- library/archive/information
- reception
- staff facilities
- FM Staff / workbase
- Security

There could be a good deal of overlap, savings and efficiencies in the costs-in-use budgets for such elements, that could be very reasonably set against relatively moderate capital costs in the remodelling/extension/conversion work required.

3.0. Activities : Consultation; Information Gathering & Sharing

3.1 Note following meeting with Dorian Hayes KCL, 14 February 2013 (first meeting)

(NB: notes very sketchy; WJ's broken RH fingers limited note taking! They give some first thoughts from DH on contacts / relevant programmes etc.)

1.0.	Links with Bankside Cultural Quarter and Lambeth City Learning Centre/ Teaching Alliance	
2.0.	Good project to follow Ebacc concerns	
3.0.	Upcoming Science Gallery (base Shard)	
4.0.	Link with Learning section RSC (Subcontracted) and South Bank Centre	
5.0.	KCL "Education in Arts and Cultural Setting" Dr Anwar Tlili	
6.0.	British Museum contact Xerxes Mazda	
7.0.	KCL have a Cities Group	
8.0.	Key Access & Diversity Group : Hope Wolf	
9.0.	Suggest Proof of Concept work is what is needed.	

Some additional personal notes from Ideas Lab 01.03.2013

- Children as the first collectors
- Children love curiosities
- Cabinets of curiosities
- Who are the Curators?
- How would concept fit with the museologists?
- Can Access & Diversity funding be a hindrance to diversity?
- What's considered the Best Practice in Primary Schools?
- Consider "Changemakers in Residence"

3.2. Notes from Informal Meeting with John Reeve, Institute of Education Bloomsbury, 7th March 2013 - 14.00pm

1.0.	WJ explained outline of thoughts/proposal to site (some) Primary Schools at (some) Museums.	
2.0.	JR highly supportive. Thinks rural/regional museums as important as urban.	
3.0.	JR suggested contacts:	
3.1.	"Discover"@ Stratford highly recommended for families/children www.discover.org.uk One of the patrons is Paul Jackson; Head of Gallions Primary School. The Treasurer is Stephen Crampton-Hayward, who is MD at Whitechapel Art Gallery	
3.2.	Jo Graham at "Learning Unlimited" (Southampton) is expert in Primary Ed./Museum. Ex Science Museum staff. JR considers she will be invaluable www.learning-unlimited.co.uk	
3.3.	The Journal of Education in Museums (JEM) is published annually and may be helpful (GEM publication " Group for Education in Museums".) www.gem.org.uk	
3.4.	Dea Burkitt, Director of Charity "Kids in Museums" (writer & journalist/ Guardian) has been pioneering a better deal for young kids in the sector www.deabirkett.com/pages/travel/kids_in_museums2.htm http://www.shaping24.eu/en/conference/audience-development-seminar-speakers/interview---dea-birkett http://kidsinmuseums.org.uk/about/ She has had something to do with Pitt Rivers Museum, Oxford www.prm.ox.ac.uk; award winner from "Kids in Museums"	
3.5.	The Herbert, in Coventry has done some impressive Educational/ Children/Families work: award winner from "Kids in Museums" www.theherbert.org	
3.6.	The Happy Museum (sic!) Project led by Tony Butler, Director of Museum of East Anglian Life, has a great deal of valuable experience.Incorporating many strands of thought, the HMP includes Creative enquiry to re-imagine the purpose of museums....sustainability....social enterprise etc. www.happymuseumproject.org	
3.7.	David Anderson, Director General, National Museum Wales (WJ has already made contact....) is a great champion of Museum Education.	

3.9.	"Learning Outside the Classroom" is an important manifesto (Nov 2006) that "sets out a vision to enable every young person to experience the world beyond the classroom as an essential part of their learning and personal development." https://www.education.gov.uk/publications/eOrderingDownload/LOtC.pdf Mail: enquiries@lotc.org.uk	
3.9.	Eton! JR referred to small museums in and around Eton and was (heretically) amused to think of having regular primary as adjunct in such a rarefied atmosphere! Eton is already doing with local state schools – the contact is George Fussey who curates their natural history museum g.fussey@etoncollege.org.uk "Eton College Collections" http://www.etoncollege.com/CollegeCollections.aspx	
3.10.	New York City Museum School (is for Grades 9-12) This is not IN a museum, but the school's curriculum requires weekly visits to museums all over NYC. http://schools.nyc.gov/SchoolPortals/02/M414/default.htm http://en.wikipedia.org/wiki/New_York_City_Museum_School	
3.11.	The new UCL Academy http://www.uclacademy.co.uk/the-ucl-academy/new-building.php great emphasis on extra-curricular activity and expects to use collections at UCL Zoology Museum "The Grant" http://www.ucl.ac.uk/museums/zoology Jack Ashby, Director of the Grant Museum actively targets the primary schools feeding into the Academy as part of his outreach strategy. j.ashby@ucl.ac.uk	
3.12.	Cluster of Schools eg. at Newham There have been outreach projects in British Museum looking at such clusters http://www.irokotheatre.org.uk/projectDetail.php?projectID=3 http://www.ft.com/intl/cms/s/2/4f14994c-7941-11e1-9f0f-00144feab49a.html#axzz2NGsLdmhr Other Museums/Collections for the Newham cluster have included Walthamstow Vestry House Museum and Libraries in Walthamstow, Hale End, Hainault, Goodmayes and Leytonstone.	

3.13.	Ragged School Museum, Bow Could be a rich connection, with hands-on active museum programme for visiting children www.raggedschoolmuseum.org.uk	
3.14.	Weston Park (WP) Sheffield WP has invested a lot of effort in its outreach/learning and could be a good regional contact http://www.museums-sheffield.org.uk/museums/weston-park/home	
3.15.	Rural thoughts.... JR is concerned about rural access; this is where Museums are under greatest pressure.	
4.0.	Funding Thoughts!	
4.1.	Consider Gulbenkian Foundation which has funded Discovery Centres www.gulbenkian.org.uk	
4.2.	Consider The Arbib Foundation (principal beneficiary Langley Academy, Slough) http://www.langleyacademy.org/pages/arbibfoundation.html http://opencharities.org/charities/296358 (David Anderson also advised) Paul Marinds led the museum side of development (link Governor for Museum Learning) http://www.langleyacademy.org/pages/sponsorsgovernors.html Jenny Blay is Head of Museum Learning at Langley (previously from Museums, Libraries and Archives (MLA) Council.	
4.3	Paul Hamlyn Fdn (ref 3.6, above) is funding the Happy Museum project	
5.0.	Institute of Education (NB after the meeting, JR sent the following contact) Caroline Heal for Primary Education http://www.ioe.ac.uk/staff/eype/ecpe_35.html John Reeve himself is http://www.ioe.ac.uk/staff/arhs_49.html	

3.3. Notes from Informal Meeting with Drs. Anwar Tlili; Jennifer Dewitt and Dorian Hayes
King's College London, 18th March 2013 11.30am

1.0.	**Present:** Dr Anwar Tlili (AT) : Programme Director, DEPS, KCL Dr Jennifer Dewitt (JD) : Research Associate, DEPS, KCL Dr Dorian Hayes (DH) : Partnerships Manager, KCI/KCL Wendy James (WJ) : Partner, Garbers & James (GJ)	
2.0.	**Purpose of Meeting:** To introduce WJ's concept of siting (some) primary schools in (some) museums; to discuss the possibility of undertaking proof of concept within the bounds of the Creative Futures programme being operated by the King's Cultural Institute, KCL.	
3.0.	**Matters Discussed**	
3.1.	Introductions were made	
3.2.	DH outlined the possible "fit" between WJ's concept and KCT Creative Futures programme	
3.3.	AT and JD outlined their fields of interest and expertise.	
3.4.	WJ explained how the concept was product of her architectural career to date. She summarised efforts and contacts w.r.t. the concept to date.	
3.5.	JD considered this could be interesting to "Free Schools" ie. those where committed Heads/staff could see significant "added value" in the model, and had vision beyond box-ticking/SATS (which must be done anyway!) http://www.education.gov.uk/schools/leadership/typesofschools/freeschools/a00222175/open	
3.6.	We would need to establish a "Co-Delivery Model" (viz between Museum ed. staff and school).	
3.7.	• AT/JD agreed that Horniman Museum would be good choice. (JD will raise as part of her reading programme activity there). • The Sunderland Museum & Winter Gardens have an engaging Learning programme.	
3.8.	AT recommended "starting small" : perhaps 2 classes for one term/one year. JD thought years 2 and 4 may be most appropriate.	
3.9.	JD applauded the active teaching practice and understanding w.r.t. cross-pollination and creating good learners in a school in Porchester that she has been following/studying ("Red Barn Primary School"? t.b.c.)	

3.10.	We need to establish a road map through a proof of concept project • SWOT analysis • where is the “added value”? • how do we tackle challenges? eg physical education • we could set up a seminar bringing together all relevant/interested parties to brainstorm this need and produce road map.	
3.11.	Proof of Concept : Deliverable/s • This could include a “Toolbox” showing how a trial could be set up. • WJ entirely familiar with adapting building fabric and facilities • need to “design” educational/curricular programme for that year; in that place; with that collection in collaboration with teacher/s and museum learning staff etc. • some definition or methodology for measuring the success (KPIs etc.)	
4.0.	**Action**	
4.1.	AT/JD and colleagues to consider proposal in general.	
4.2.	Need to complete associated form for support under the Creative Futures Programme (post meeting note : DH has forwarded form to all parties.)	
4.3.	WJ said she would contact • David Anderson, Director General, National Museum of Wales and incoming president of the Museum Association (from 01.04.13) • Caroline Heal, lecturer in Primary Education at IoE.	
4.4.	If successful we could identify small team to undertake Proof of Concept Study, nom. 6 months (t.b.c.)?	

3.4. Informal Notes Following NLA Conference : "London's School Building Crisis: Filling the 90,000 gap"

1.0.	**Munira Mirza, Deputy Mayor for Education and Culture, GLA**	C/F study
1.1.	General consensus at City Hall; there's a crisis!	
1.2.	New unit there "New Schools for London (NSFL)"; formed to help short-cut bureaucracy and they're looking to find innovative ways to solve the problem	*
1.3.	London has 1/2 the national shortage	
1.4.	Highest priority boroughs are Croydon; Waltham Forest; Newham; Lambeth (South)	
1.5.	11,000 children currently in Portakabins	
1.6.	Looking to make sites available; ease Permitted Development etc.	
1.7.	There is some resistance to Free Schools, (as a lot aren't in areas of most need...)	
1.8.	NSFL also trying to assist schools through planning process	
1.9.	Some boroughs considering greater mobility across borough	*
1.10.	Nevertheless they do expect/want more Free Schools too; quickly! A (limited) pot of public funding has been established.	*
1.11.	They're looking for buildings/solutions that will last	*
1.12.	Looking at other models for inspiration • the Oscar Niemeyer Schools in 80's (Brazil); British Council have recently brought architects over, having had that experience	
1.13.	Any ideas to deputy Mayor via assistant Elena Narozanski e.mail elena.narozanski@london.gov.uk who's keen to meet as many people as possible.	*
2.0.	**Clive Grimshaw, Interim Head, Children and Young People's Services, London Councils**	
2.1.	National Audit Office (NAO) and EFA always varying their views on stats/ demand.	
2.2.	"London Councils" is a politically led; cross-party body of 33 boroughs.	
2.3.	From 2001 - 2011 they have experienced 27% increase in birth rate.	
2.4.	2012 - 2020 projected +18% Primary +20% Secondary	
2.5.	2011/12 - 2015/16 Primary will need +14% places in London 8% - 9% in rest of England	

2.6.	By 2017/2018 Secondary will need +10% places in London rest of England STET	
2.7.	The costs of Secondary schools are significantly more : therefore keep available sites for secondary? (and find other solutions for primary?!)	*
2.8.	Existing capacity is at breaking point; the “low hanging fruit” projects have been done!	
2.9.	Brent have called for bids for 11 schools over next 2 weeks! at nom. £1200/m² as a “build budget. Renovations could be less. t.b.c. (£800?)	*
2.10.	In London the shortages quoted are 79K primary places + 12K secondary = nom 90K by 2015/16 (the NAO says 88k)	
2.11.	There is a Priority Schools Building Programme, expected to be funded by - PFI (a second, modified version “PF2”) - EFA	
2.12.	There is some Basic Needs Capital: for 2013-2015 it is £1.6 billion (of which London gets 36%) The targetted basic needs funding in London will be £932m.	
2.13.	There is greater diversity in school types in London. more academies; more free schools	*
3.0.	**Janie Chesterton, Education Sector Director, Willmott Dixon Construction**	
3.1.	Willmott’s have been looking at ways/strategies to cut build costs and build more quickly	*
3.2.	They have been involved in schemes in Bradford, Leeds and Bristol	*
3.3.	They’ve been looking at J.V. scopes and forms of delivery, using their “Sunesis” Programme	
3.4.	Key has been : how quickly can they get to site?	
3.5.	Bold Ambition requisite!	*
3.6.	Schemes have included “Synesis - Keynes” (Rugby 2FE for £2.2m) “Synesis - Davey (Manchester) with a Play Deck on the Roof	
3.7.	Car parks have provided some sites	
3.8.	Local supply chains have been important	
3.9.	Keen to see what they can standardise (WJ: What *should* be standardised?) Refer their site www.sunesisbuild.co.uk	*
3.10.	Design Life and Lifecycle costs important	

3.5. Informal Notes following meeting held 1st Dec 2014

Meeting:	With David Anderson to discuss WJ outline proposal on a project (Proof of Concept) to locate Primary Schools within Museums.
Date:	Monday December 1st 2014
Time:	9.30 - 10.15am

1.0.	**Present :** David Anderson Dir. Gen. NMW, President Museums Association Wendy James Partner, Garbers & James
2.0.	WJ outlined her suggestion, that she has been researching in a time limited way for a number of years, that Primary Schools could be advantageously placed directly attached to, or within the property boundary of, Museums. Kings College' Cultural Innovations unit are keen to support / mentor, especially on the proof of concept and educational benefits side. WJ/Kings are looking for possible Museum partners. Ideally WJ would like to see proof of Concept work done both in rural and urban contexts. DA thought that this could be a good symbiotic possibility in places of rural poverty (eg. parts of Wales), where museums are also under threat.
3.0.	Leads for follow-up, suggested by DA
3.1.	Look at work Sonnet Takahisa has done at Brooklyn Museum (now Dep. Dir. Education, Newark)
3.2.	Prof. Dai Smith, Arts Council Wales is heading up an Arts and Schools programme, addressing targets/concerns for every school in Wales ("Creativity is Essential to the Success and Fulfilment of Young People")
3.3.	Baroness Kay Andrews Report : Report on Culture and Poverty (BKA is NM Wales Trustee)
3.4.	Rebalancing Our Cultural Capital (3 No. Reports - viz. London and the rest of England) There is a review group for Wales : Dr Haydn Edwards (VP/NMW) Prof Gaynor Kavanagh (Cardiff School of Art & Design) Adrian Babbidge (Association of Independent Museums) and (? LG.....)
3.5.	Look at National Wool Museum, Wales in Llandysul
3.6.	"People's Collection Wales" orchestrated by Rheinallt Ffoster-Jones

4.0.	Summary thoughts • consider reinvention of local museums • relationship to Health and Wellbeing • DA and WJ to meet with suggested dates • 19/12/14, 12.30 - 13.30 • 15/01/15, 14.00+ t.b.c Post Meeting Note: We have held 15/01/15 in Kings/WJ/DA diaries - exact time t.b.c.

4.0.	**Finn Williams, Deputy Team Leader, Placemaking, LB Croydon**	
4.1.	Croydon has major shortage with tremendous time pressure.	
4.2.	Keen to develop some long term Strategic thinking as current panic and rapid applications etc. is not this!	
5.0.	**Maggie Harriott, Education Strategy Manager, Lambeth**	
5.1.	Lambeth (South) has major problem; they had 11 BSF projects pulled! They need 39 forms of entry (FE) by 2018/19	
5.2.	They consider free schools “unknowns:!	
5.3.	They’re they’re beginning to ask the question “How can we educate if we haven’t got school buildings?” (sic! WJ)	*
5.4.	Considering bussing for more children; traditional neighbourhood not so fixed.	*
5.5.	Considering split school shifts (would also be good for museum sharing? WJ)	*
5.6.	Considering “virtual learning”	
5.7.	They’re looking for “safe schools” in existing places [WJ idea : if we were extending a museum building for a school - it may be that the museum environment would be better in the new part?!]	*
5.8.	Shortfall between need & funding in London is nom, 38-39%	
5.9.	In Lambeth every school has had feasibility study done (look at Museums! and/or libraries?WJ)	*
5.10.	Are there sometimes conflicts between Free school and Borough priorities? (WJ: would be good to identify museums in areas where this wouldn’t be the case...) Boroughs would like free schools to approach them in spirit of openness.	*
5.11.	There is an additional stream of funding for Free Schools; the Deputy Mayor wants to work together with free schools and boroughs.	*
5.12.	Excellent EAs don’t need academies of free schools!	
5.13.	In Cuba there was a scheme where Museums/galleries were used pro term t.b.c. (Esther Caplin): esther.caplin@hotmail.co.uk www.esthercaplin.com	*
5.14.	Deputy Mayor said she’s looking for a much wider range of partners.	*
5.15.	We could look back at some previous UK exemplary programmes. eg. Herts and Nottingham post-war. As well as general adage “Loose fit; low Energy....”	*

6.0.	**Mairi Johnson, Deputy Director, Design, EFA**	
6.1.	The various finding pots or ways of most efficiently using budget, are: • free schools (slow process? t.b.c.) • Priority School Building Programme • Making Efficiencies • PF (2) • Changes to specs. • Basic Need • Devolved finds to LAs • Academies Maintenance Funds	
6.2.	Early March 2013 “Capital Allocations for London 2013-15” was published. • Croydon; Newham; Barking & Dagenham; Redbridge; Waltham Forest top priority.	
6.3.	Anticipating in London 23 primary schools	
6.4.	Need Good Briefs!	*
6.5.	Increased efficiencies hoped for through • encouraging standardisation • optimising procurement • reducing procurement time • “keen” use of space	*
6.6.	Have been establishing “Baseline Designs” • 2FE Primary = 420 children • 1200 Secondary (with “add-ons” for Art/Business Studies/VIth Form)	
6.7.	PF2 Looking for element of public money/debt; say 80:20 (pte:pub)	
6.8.	(PF2) FM should be “owned by” school so that extra mural time and use of premises can be optimised	
6.9.	(PF2) Lifecycle costs should be estimated and will then be held in a pot (viz. public...)	
6.10.	(PF2) Financial reporting to Treasury; new forms of investment required.	
6.11.	(PF2) Changes to Spec. that are sought, include • Temperature : adaptive thermal comfort • Ventilation : (natural) cross ventilation • Lighting : climate-based modelling • Acoustics : good! • Energy consumption risk shared with contractor • “Free Running” systems; viz. Passive (eg cooling); not Active • Baseline Designs nom 3.7m FL. to FL.	
7.0.	**Roger Hawkins, Director, Hawkins Brown**	
7.1.	Recommending Growing (extending) Existing Schools, and Traditional Estate Management.	
7.2.	Do a lot of work for LDBS (London Diocesan Board for Schools) whom they regard as an educated Client with long term experience of Traditional Procurement. (WJ: could they be partner?)	*

7.3.	Also consider sharing public open space to provide external learning (and recreation...)	*
7.4.	Have used external play decks (roofs/enlarged “balconies”) as external learning/recreational space	*
7.5.	Hall/s have been shared spaces with Community (also for dining; sport; assembly...)	
7.6.	These extension projects especially value the social fabric of a neighbourhood (ie. in contrast to green fields/car parks etc...) “Get the front door in the right place”	*
8.0.	**Nick Evans, Director ECE Architecture**	
8.1.	People don’t talk about teaching any more! It’s **Learning**.... by Absorption; Osmosis; Observation It’s a **fluid** activity...	*
8.2.	Is the School the Right Place?!	*
8.3.	Referred to Swedish Independent Schools as fluid model with Open Learning Zones/flexibility	*
8.4.	Roof decks and gardens have been developed, including veg. patches; potting and compost areas; “insect hotels”	*
8.5.	Street level restaurant (Commercial Road) gives dynamic link with surrounding neighbourhood.	*
9.0.	**Dominique Oliver, Director, PTEa**	
9.1.	Innovative funding packages through Co Location of school with Community facilities (garden; library; cafe; offices)	*
9.2.	School in same block as residential units; studios for artists etc.	
9.3.	Outdoor space transforms into a market square	
9.4.	Security line/s change as different functions dominate; can be shared management costs.	*
9.5.	General plea for diversity of models; looser nature of schools	
9.6.	Location is KEY!	*

4.0. Learning Methods : The Qualities of Museum Experience and Potential for Learning

- *“Upside Down” children first*

- *“Inside Out”*
  - *relay worldwide museums to other children!*
  - *cinema for all (eg. Phil Grabsky; Seventh Art Productions)*
  - *Khan Academy?*
  - *layers of experience / magnifying glass*

- *App : the personal connections to an individual object; family history meets global history. The intersection*

- *Haptic technologies; communication; perception etc.*

- *Image : learning through image alone; Visual Thinking Strategies*

Primary school place demand set to rise

By Angela Harrison
Education correspondent, BBC News

England's primary school population is set to rise by 18% in the next eight years, experts are predicting.

And by 2015, numbers are expected to grow by 8%, according to **statistics** from the Department for Education.

Secondary school numbers have been falling and will continue to do so until 2015, when the surge in primary pupils will start to feed through.

The government has pledged to spend more than £4bn in the next four years on creating new school places.

Labour says the figures confirm there is a crisis in school places, but Schools Minister Lord Hill has accused Labour of ignoring warnings about population growth when in power.

Other recent projections said 450,000 new primary places would be needed in England by 2015.

There are hot-spots of need around the country, with London under the most pressure.

In London, by 2015, the primary age population is expected to be 18% higher than it was in 2010.

But the growth is not only expected in the South East. In the North East and South West, primary numbers are expected to rise by 9% over the same time.

'Warnings ignored'
England's birth rate has been rising since 2002 and is expected to continue to grow, the statisticians say.

The government says its policies of allowing good schools to expand and of creating new free schools should help.

Schools Minister Lord Hill has accused Labour of ignoring warnings about population growth and future shortages when it was in power.

"The last government knew there was an issue as early as 2004 but sadly did nothing," he said.

"Worse than that, they actually cut funding for new places while squandering millions on expensive secondary schools.

"Unlike Labour we are taking the determined action needed to deal with this problem by spending more than £4 billion on extra primary places."

Critics say the government's free school programme will not meet the need for places.

Local authorities have a legal duty to provide places for children, but are facing many changes in the organisation and creation of schools.

Some saw their plans for new schools or the re-building of existing ones scrapped with the cancellation of the Building Schools for

the Future programme, which the coalition said was too expensive and bureaucratic.

Labour's Shadow Education Secretary, Stephen Twigg said: "Today's figures confirm the crisis in primary places in England. Many schools are at breaking point with pupils potentially being taught in warehouses and empty shops.

"Labour have been warning the government for months about the huge shortfall in places.

"But instead of addressing this crisis head on, the government has slashed the capital budget by nearly two thirds and are creating free schools, many of which are in areas where there isn't a demand for extra places or from parents."

Appendix B

Basic Need Funding Allocation to LAs 2012

Annex A

2012-13 - Basic Need allocations: £600m

LA number	Local Authority	Additional allocation for 2012-13
304	Brent	£30,883,239
320	Waltham Forest	£29,897,429
301	Barking and Dagenham	£29,762,837
317	Redbridge	£23,362,515
801	Bristol, City of	£22,810,315
316	Newham	£22,437,406
205	Hammersmith and Fulham	£18,757,086
313	Hounslow	£16,699,075
209	Lewisham	£15,993,877
919	Hertfordshire	£15,306,602
319	Sutton	£15,033,608
936	Surrey	£14,097,267
860	Staffordshire	£12,861,183
352	Manchester	£12,632,967
873	Cambridgeshire	£12,469,228
871	Slough	£11,774,375
308	Enfield	£10,795,691
938	West Sussex	£10,735,396
383	Leeds	£10,173,164
306	Croydon	£9,787,132
850	Hampshire	£9,777,093
303	Bexley	£9,587,078
307	Ealing	£8,982,940
380	Bradford	£8,093,732
330	Birmingham	£7,801,857
872	Wokingham	£7,776,756
211	Tower Hamlets	£7,525,192
315	Merton	£7,259,120
314	Kingston upon Thames	£6,598,851
312	Hillingdon	£6,288,838
888	Lancashire	£6,075,119
358	Trafford	£5,963,326
935	Suffolk	£5,907,860
931	Oxfordshire	£5,520,025
203	Greenwich	£5,479,580
886	Kent	£5,352,342
856	Leicester	£5,338,187
208	Lambeth	£5,284,748
212	Wandsworth	£5,028,058
318	Richmond upon Thames	£4,957,538

		DFC (Note 1: Figures are Final - updated April 2012)		Maintenance (from £1.2bn - see notes)		Total	Basic Need	Total

Delays condemn children to studying in crumbling schools

LGA media release 12 March 2013

Tens of thousands of children are being condemned to studying in dilapidated school buildings because of Government delays in providing the funding earmarked to fix them, local government leaders are warning.

New research by the Local Government Association (LGA) shows that nine months after funding was announced to rebuild 261 of the country's most run-down schools many head teachers are still unaware of when they will see work begin.

Many others have been told that contracts for building work are unlikely to be awarded until 2015, meaning work is unlikely to be completed until at least 2016, six years after the £2 billion building scheme was first announced.

A number of councils, which are already under intense pressure after a 32 per cent reduction in education funding, now say they have been left with bills of tens of thousands of pounds or more to fund the bare minimum work needed to keep these schools open until vital work begins.

This includes carrying out urgent roof repairs, repairing heating systems, removing asbestos and fixing dangerous wiring work.

Devon County Council has estimated it will need to spend £2.5 million on "urgent health and safety works" for eight of its schools that are due to receive Priority School Building funding, while North East Lincolnshire has already had to spend £1.4 million on maintenance works in 2011/12.

Suffolk County Council has spent £1.1 million on essential works for the two worst school buildings in the county. Bury Council has set aside a £2 million contingency from its emergency fund to cover the potential cost of essential repairs at three of its schools while it awaits news on essential Government support.

Council leaders are now voicing concerns about delays to the programme, which mean tens of thousands of school children could be left studying in schools, categorised as being some of the most run-down in the country, with problems such as leaky school roofs, drafty windows, inadequate toilet facilities, substandard kitchens and outdated security.

The LGA is now calling on Government to get on with the job of awarding contracts so substandard schools can be rebuilt more quickly and councils and head teachers can ensure children have good quality, safe and hygienic classrooms.

Cllr David Simmonds, Chair of the LGA's Children and Young People Board, said:

"The announcement of much needed funding to fix hundreds of the country's most crumbling schools was as a positive move, but that was last summer and many parents are still none the wiser about when their child's school will be brought up to scratch.

"This situation is now unacceptable and threatens to severely impact on our children's education. Councils are stepping in to keep schools running while Government struggles to get its act together. Local government is already carrying out basic repairs but we could deliver so much more with funds that are currently tied up in government red tape.

"In the current tough economic climate we know it's not going to be possible to rebuild every school from scratch and councils aren't asking for gold-plated taps and state-of-the-art luxury staffrooms. But heads and parents are telling us that the condition of some schools is so bad its getting in the way of providing a good education. Despite the hard work of teachers, the possibility that children could excel in such poor surroundings is a challenge too far.

"It's now vital that mums, dads, teachers and children are given definitive answers on the future of their local schools. The department's refusal to provide any reassurances is leaving schools in limbo and with councils' stretched education budgets having already suffered a 32 per cent cut there is little room for manoeuvre at a local level.

"Government needs to act quickly and reassure mums and dads and head teachers that plans are being put in place to fix our crumbling schools."

A total of 587 schools applied for funding through the priority school building programme. More than half (56 per cent) were unsuccessful and councils are working with them to put alternative plans in place.

The Government created the Priority School Building Programme after it scrapped the Building Schools for the Future (BSF) project set up under Labour.

ends

Notes to editors

The deadline for schools or councils to bid for funding under the £2 billion Priority School Building programme was 14 October 2011.

The schools that will receive funding under the Priority School Building programme were announced by the Secretary of State on 24 May 2012.

A total of 261 schools were successful out of 587 applications for funding.

Record of attendants/contacts at the Ideas Lab session 01.03.13

You are warmly invited to a creative networking event for academics and cultural sector innovators hosted by King's Cultural Institute:

IDEAS LAB: Rethinking Access and Diversity in Research, Cultural Policy and Creative Practice

This event is part of King's **CREATIVE FUTURES** programme: an initiative which aims to further innovation and knowledge exchange between academics at King's College London and the cultural sector. The meeting will provide an open space for people interested in Creative Futures and Access and Diversity issues to hear and share ideas for potential projects. The workshop will address the following issues and questions:

1. We want to diversify the reach of research and cultural/creative practice. How might the development of new models and methods of engagement with cultural production achieve this?
2. We want to diversify the arts and cultural workforce. How can our collaboration help to address inequalities within the sector?
3. We want more permeable/accessible buildings and locations for arts activities. How can we work towards developing the physical environment?

Date/Time: March 1 2013, from 14:00-17:00
Place: Anatomy Museum, King's College London

To reserve a place please register with yvonne.castle@kcl.ac.uk, giving a line or two about yourself (departmental or organisational affiliation, etc.).

For more about Creative Futures please see:
http://www.kcl.ac.uk/cultural/creative-futures/index.aspx

Wendy James CV

Appendix E : CURRICULUM VITAE

WENDY A. JAMES, Dipl.Arch.,BSc(Hons.), RIBA

Current Position

Partner, Garbers & James, London, UK

Wendy James formed a Studio at the end of 2005 in London UK with partner Thore Garbers, Garbers & James, which holds commissions from major public international cultural institutions, and private clients and is developing a number of product designs for production.
Projects include

- Briefing & Design Management Consultancy, Tate Modern, London UK
- Museum Consultancy including Strategic Planning; masterplanning; Exhibition concept; Detailed briefing - confidential major Asian musuem
- Strategic Planning private art collections centre - confidential middle-eastern project
- Executive Architect for Maggie's Cancer Caring Centre, Swansea (Kisho Kurokawa R.I.P), Wales, UK
- Architect, "Ocean Mind", Kiel/Hawaii – Environmental Education Centre.
- Design Consultancy, Royal Ontario Museum, (ROM) Toronto, Canada
- Strategic Planning, Salisbury Cathedral, UK
- Private Houses UK (London and Dorset)
- Private Houses Perigord, France
- Private House, Piedmont, Italy
- Design Centre, Stuttgart, Germany
- Executive Architect Animations Studio (Magma, Berlin), London, UK
- Signage, design and realisation, Royal Ontario Museum Toronto, Canada
- Art installation, design and realisation, (ROM) Toronto, Canada
- Product design ranges : airport furniture ; chairs; table; boardroom furnishing for Schimmel and Wilde & Spieth, Germany

1996 – Feb.2006

Senior Associate Architect, Studio Daniel Libeskind, New York, USA / **Architekt Daniel Libeskind AG**, Zürich, Switzerland

Associate responsible for:
Imperial War Museum North, Trafford, Manchester, UK
London Metropolitan University, postgraduate centre, London, UK
Royal Ontario Museum, Toronto, Canada
The Spiral Project, Victoria and Albert Museum, London, UK
Multi Media Faculty building, City University, Hong Kong
Residential and retail, high-rise project in Warsaw, Poland
Unawatuna, Sri Lanka : tsunami relief programme of housing & community
Jewish War Veterans Memorial, Toronto, Canada

Consultancy (constructional detailing;value engineering; project management)
Westside, Bruennen, urban design / mixed development, Switzerland;
Theatre and mixed commercial development, Dublin
Mailboat Pier, Dublin ;
Residential high-rise, Sacramento, USA
Residential high-rise, Covington, Kentucky, USA

Specification writing within the Studio (NBS Format), including specs. for Denmark, Italy, Canada, USA

Contract and PII negotiation / consultancy within the Studio
(jobs in UK, USA, Spain, Israel, Mexico, Germany, Denmark, Japan, Canada, Hong Kong, China, Singapore, Korea)

Further Competitions
International Quilt Study Centre, Lincoln, Nebraska, USA (finalists)
Marina Bay, urban design /mixed devt., Singapore (last round)
National Palace Museum, Taiwan (finalists)
Corcoran Gallery of Art, Washington DC, USA (finalists)
Millenium Community, Allerton Bywater, Leeds UK (finalists)
Magna Carta Project at Salisbury Cathedral, UK (finalists)

1990 – 1996 **Principal Architect,** Building Design Group, Shropshire C.C., UK
Responsible for design and realisation of public projects in County, including schools, museums, libraries, courts, housing, sports facilities. New build and renovation works. Regional prizes.

1987 – 1990 **Associate Partner,** Leonard Baart & Nicholas James, Shrewsbury,UK
(now Baart, Harries, Newall)
Private and church educational buildings, social housing, industrial and research projects, diocesan architects to Hereford and Lichfield Dioceses.
New build, renovation and restoration projects : national prize winners including Europa Nostra

1977 – 1987 extensive experience in architectural practices throughout UK, including
York University Design Unit, Institute of Advanced Architectural Studies, York,
Allen Tod, Architects, Leeds
Partner in Nicholas and Wendy James, Architects, Shropshire
Sandy Brown associates, Architects and Acousticians, S.Queensferry
Taylor Bown and Miller, Architects, Harrogate (now Darby, Bown & Miller)

Lecturing experience Honourable Visiting Fellow, UWIST, Cardiff
King's College, London, MA "Towards Tomorrow's Museum"
ICA, London: Pecha Kucha – post-tsunami project Sri Lanka
UCE, Birmingham – Coordinated Production Information
LMU, Business School – Value of Architecture in International Business
Tile Conference, Berlin, - Signature Buildings and Regeneration
Cambridge School of Architecture – Construction IWM-N, case study
UMIST Civil & Construction Engineering – Construction
International Symposium on Ceramics – The Spiral Project at the V&A
Regional Architecture Groups, Schools and Colleges – variety of subjects

Membership of Professional and Associated Bodies

2010 Museums Association (0032266)
1986 Royal Institute of British Architects (05829797)
1984 Society for the Protection of Ancient Buildings
1981 Pt. III / ARB Registration (048320F)
1980 Edinburgh University, Diploma in Architecture
1977 University of Wales, BSc. (Hons.) Architectural Studies

Languages English, German, Conversational French
Other Award–winning Restaurant Owner 1983 - 1987

Appendix G

WJ Thoughts and Inspirations

Appendix G:

DRAFT Museums / Primary
Thoughts & Inspirations

INSPIRATION

- Salisbury
- Trainee Architects
- Felix (brewing)
- Grayson Perry
- History 100 objects..... consequential thinking
- CTJ : “one must handle the stone; an image is only an image and not reality...”

EDUCATIONALLY

- value of tangible object experience teaching
- “everyday participation” culture/citizenship/children/families
- understand the past and project into the future
- arts; sciences; humanities
- citizenship; diversity; accessibility

PRIMARY SCHOOLS

- small
- flexible
- foundation for secondary
- small people highly underestimated in terms of learning capacity once stimulated or inspired (eg. bi & tri-lingual children...)

Appendix H

WJ Notes on KCL Form

King's Cultural Institute
Creative Futures Programme 2012-15

WJ notes on Form, in order of occurrence w.r.t. the Concept of siting (some) Primary Schools in (some) museums

1.0.	**Page 1**
	para 1: I would submit that this concept: • is innovative • should engage academics and practitioners from both the world of museums and (primary) education. • should encourage (in the study/proof of Concept work) knowledge exchange between KCL/museums/schools and, in this case, the potential realisation of such a concept would be enabled by architects and other creative designers. • could add to the qualitative experience of primary children's cultural life (in London if this is where our modelling / trialling can take place) • could hopefully be inspiring for children, who may later feed into the creative industries / economy. • will involve architect/s; learning professionals; museum professionals and policy makers, from all groups accordingly
	para 2: • in this case the bridge will be between KCI/KCL and practicing architect (in this case the innovator!) • in the case of a successful Proof of Concept showing added value, inspiration and measurable improvements in Learning (qualitative and/or quantitative) then this clearly will be of "value to others", viz. the children and families and the museums and schools. The impact could be significant. • if results were positive, I would suggest they would certainly warrant further research and practice • in the latter case, one would hope to stimulate primary education in its core activities; there would automatically be the connection to King's research.
	para 3: • we have discussed brainstorming seminars etc. • we have discussed buying in specialist/s (GJ are architects and museum consultants; we can also provide some additional research/administrative assistance t.b.c.)
	para 5: • are there any needs/relevant pieces of work that would be eligible for "Seed Fund" grants?

2.0.	**Page 2**
	(bullet 1) - we need museums and primary educational academic expertise, presumably.
	(bullet 2) - we would be aiming to generate new knowledge; in this case relating to the most effective ways of learning; inspiration in Learning; most effective use of existing (underused?) rich resources etc.
	(bullet 3) - GJ can certainly write such a letter. (we'd need to consider available resource in relation to nature of funding ie. taking staff out of otherwise full time employment...). Other outside partners may need to be included?
	(bullet 4) - the concept is founded in such a way that its proof is bound to impact policy; practice and products (educated children!) having primarily social impact, but maybe economic too (viz. cost savings through sharing building fabric and teaching resource)
	(bullet 5) - with Proof of Concept, the projected impact should be durable (without end?) / sustainable and clearly operate on the basis of newly forged strategic relationships. (REF etc ? - unknown....)
	(bullet 6) - Proof of Concept should clearly demonstrate sustainability in an operational model; would need to lever further income and hopefully could reduce costs in new school building? (t.b.c.)
	(bullet 7) - Whilst Access and Diversity may be the strongest reference, all 3 others could well be integrated in part
	(bullet 8) - "sustainability of PI" (not understood....)
3.0.	**Page 3**
	• **Project title? to be agreed** Related phrases etc. • "Our (primary) School is a Museum..." • "MAKE (primary) Schools : Museums As Knowledgeable Environments.... in which to site primary schools" • "Proof of Concept : There could be significant educational benefit to children as well as mutual advantages, in siting (some UK) Primary Schools in (some UK) Museums"
	• **Project Partners** KCI / DEPS / G&J • with IoE? (john Reeve? Caroline Heal?) • with 'a'; 'b'; 'c' Schools • with 'x'; 'y'; 'z' Museums • with additional Consultants (David Anderson? / Museums Association etc) • with any other Best Practice Models of schools/museums operating closely related programmes?

	• **Creative Futures theme** (a) Access and Diversity: • it would significantly increase children's physical and intellectual access to Museums. • it would (hopefully) increase those children's families' access to Museums • in increasing (this particular) audience to the Museum, we would hope to increase its own diversity record • diversity in educational resources (collections) for the children • diversity in the parameters of Interpretation for curators/museum learning staff (b) Curation for the 21st Century • Children are/were the first Collectors... • Children as curators? • Who are the curators? • Direct links/cross pollination between curators and Primary Schools (c) Cultural Encounters *(not quite sure of intention here?...)* • children (and families) encountering Museums and Collections to far greater degree/depth. • Museums encountering wider audience at depth • greater chance to question relevance and connections between the Collections and the children (d) Arts and the Digital • a counterpoint project; the physical object seen against the digital image/ information/record • primary children and teachers using in-depth connection with collection/s to inspire art works • primary children learning and understanding the value of digital capture and research w.r.t. the Collections • developing (digitally) their own personal connections with the Collections • establishing digital connections with <u>other</u> museums/collections/children related to collections • having had closer, tangible experience of a collection, better understanding to nature of what other digitised collections might actually mean or represent
4.0.	**Page 4**
	Point 5 : from GJ - Wendy James : Role • to lead physical fabric modifications to museums in accordance with school's functional requirements (brief) • coordinate interface between Museum and school (eg. safe external space for physical education/play; no compromise on Care of Collections etc.) • I would be pleased to be part of team "designing" Educational programme, as long as supervised by mentor/s! • can undertake multifarious research roles (maybe with assistant from own office? t.b.c.); subject to agreed structure/mentoring

	Point 6 : Project Description This is a project based on finding new connections and inspiration from the nation's collections, in the teaching of primary school children. It uses some established facts • that children learn more effectively given the contact and understanding of physical objects and tangible experiences • that working with objects can improve wellbeing • that historically people (scientists) have made great discoveries and advances, through close and precise observation. What comes next in a sequence of development? The project aims to effectively and efficiently use both existing collections and existing buildings in a new way, that might assist in the current dramatic shortage of primary school places. Some remodelling or extension of premised may be less expensive than finding a whole new site and building a whole new school. Such a project can strengthen a neighbourhood's cultural content, continuity and understanding, leading to positive improvements in matters such as Access and Diversity and Citizenship. The project will introduce the rich experience of museum collections to children and families in a constant, new habit-forming way. School buildings are empty; museums are full of treasures; children are curious. Let our treasured children find the treasure!
	Point 7 • grave shortage of primary school places (refer Basic Need Places allocation; reporting over shortage; upcoming NLA conference) • museums are closing; they are under tremendous pressure w.r.t. spending cuts • there may be a need (?) to counter developing children's digital skills with a more tangible understanding of objects....
	Point 8 GJ/WJ brings the skills of solving physical problems in many dimensions; "the egg solution"! Architects are trained to absorb many (briefed) required parameters and design a physical solution that supports all functions. In WJ's museum and educational work, she has spent years designing and realising facilities for learning around Museum Collections. WJ's contribution is to bring expertise in 2 sectors together in one. She requires policy support in primary education and museum's roles to ensure that there is no compromise in either sector's performance; rather that there is significant added value.

	Point 9 : Outputs • a toolbox demonstrating (a) how to adapt a building (b) how to deliver an educational programme inspired by and relating to a Collection • proof of concept/analysis to show that children's curriculum is not compromised by such a method, but rather enhanced • policy status review validating educational and museum sides Impact • an efficient productive and inspiring way to provide some of our country's primary places • a way of enriching cultural life for children and families in urban and rural contexts • a re-awakening in the value of objects; increase in observational skills and analysis • review of some teaching methods to increase joy and effectiveness of learning; consider systems such as "Visual Thinking Strategies".
	Point 10 Beneficiaries?! • children : say • 3 projects (London; another city; rural); • 2 classes in each museum; • one term each class over one year (3 terms) • = 3 x 2 x 3 = 18 classes of 30 = 540 • teachers = 18 + 18 museum staff? • associated professionals in study? say 20 • say 600; followed by wider application if proved successful?
	Point 11 (can't see whole point described in the form...) • findings to be presented/distributed via associated professional team to relevant policy makers • reports can go into professional journals? educational; museum; architectural etc. etc

	Point 12 (assume nom 6 month proof of concept) Tasks will include <u>month 1 :</u> • completing SWOT analysis • ensuring no threats are show stoppers • validating educational/curricular approach in theory <u>month 2 :</u> • finding partnership museum/s & schools <u>month 3 & 4 :</u> • co-developing curriculum for given years in conjunction with school/ teachers and Museum Learning department <u>month 5 :</u> • planning building fabric and museum programme/operational modifications <u>month 6 :</u> • producing Toolbox describing physical project and associated teaching project. Develop so that project can be started once physical modifications undertaken. Follow up • physical building fabric modifications (say 2 months) • one year monitoring project over 3 schools; 2 year groups.
	Point 13 • to be developed • GJ can send time charge details
5.0.	Risk Register attached

Primary Schools/Museum Risk Project Register

ITEM	DESCRIPTION	CURRENT STATUS	RISK ISSUE	RISK IMPACT 'X'	RISK LIKELIHOOD 'Y'	RISK RATING 'X' x 'Y'	ACTION	BY	WHEN	RISK AFTER MITIGATIO	FINANCIAL EXPOSURE (£)	PROGRAMME EXPOSURE (Months)	NOTES
1													
1.1.	External Primary Space		That Children will not have adequate protected external space for play and physical education	M	M	A	Expect to find some external space (possibly more limited than ideal) for trial period. Consider roof areas in cities etc.			G			
1.2.	Collections Security		That having another group in the museum over different times and with different type/level of access, will pose security risk to collections	H	G	A	Negotiate with FM/Security and Curators safe methodologies			G			
1.3.	Teacher Location/Supervision		That (for proof of concept time; not the finally intended whole school configuration) teachers will feel "divorced" from rest of school support	M	G	G	Negotiate supervision/ mentoring scheme; consider using Museum Staff as extra support			G			
1.4.	Parental Opinion		That Parents or carers will find it inconvenient to take children to school in a different place	M	G	G	(Most likely to be issue for families with more than one child at school). Address each specific case, as required.			G			
1.5.	Unsuccessful trial		That concept fails to add value and children's educational experience reflects badly in their marks etc.	G	G	G	Keep trail small to limit on o/a primary career eg. hold to one term? Trial with years less dependent on test results for new schools etc.			G

KING'S College LONDON

KING'S CULTURAL INSTITUTE
Creative Futures Programme 2012-2015

Creative Futures is an investment programme designed to support innovation, engagement, and knowledge exchange between academic faculty from King's College London and the wider cultural and creative industries. The programme aims to make a qualitative and quantitative impact on London's cultural life and creative economy by facilitating the College's engagement with artists, practitioners, arts professionals, cultural policy-makers and cultural organisations.

The purpose of the fund is to help to build bridges between King's academic research and innovators outside the College. Funding may be used to construct these bridges where King's research will be of value to others, and where it will have the greatest impact. *Funding is not available to pump-prime conventional academic research or teaching with partners* – although this may be a valuable side-benefit. It is to help partners to be more innovative in their core activities through access to King's research.

Funding of up to £30K can be used for a range of purposes including, though not limited to:

- running engagement events and meetings – catering, accommodation, room hire, travel
- marketing and PR activities
- buying-in of specialist help e.g. project management
- buy-in of teaching and/or administrative support for a limited period to cover existing commitments (please note that only costs incurred by the staff member replacing the funding awardee's time may be charged to any award made. Note, too, that eligible costings include all those related directly to the incoming staff member's salary, including National Insurance and pension contributions, and London Allowance. Appropriate salary scales can be found at: https://internal.kcl.ac.uk/about/ps/finance/staff/scales.aspx Since these awards are not subject to Full Economic Costing, costs associated with estates, overheads, and other forms of 'indirects' are *not eligible*)

Funding cannot be used:

- as additional salary or as part-payment of a staff member's existing salary, or indirect costs
- to buy out research time as it is expected that projects will be of relevance to, and inform, current and future research activity
- to build new websites as projects are expected to use King's existing web infrastructure

Partnership development or "Seed Fund" grants of up to £1,500 are available as a first stage towards making a full proposal and may be used to support a partner organisation's contribution (the individual within that organisation), project scoping, or an initial series of meetings or seminars with target partners.
Larger funding awards may be made available to cross-disciplinary multi-partner projects which have high potential to generate transformational change within the creative & cultural sector.
To be eligible for Creative Futures funding, projects must:

- Demonstrate the application of an academic's existing expertise or knowledge in responding to a clearly identified question, challenge or opportunity in the creative & cultural sector;
- Further the generation of new knowledge;;
- Have agreed collaboration with external partners from the creative and cultural sector on an equal footing, and include a letter of support from the external partner(s) outlining their commitment of resource (in kind, or real terms);
- Have a clear vision of how proposed activity may influence the policies, practices and/or products (e.g. exhibitions, performances, digital tools) of the creative and cultural sector as a whole and therefore have economic and social impact;
- Articulate the durability of the projected impact and development of new strategic relationships, as well as the potential impact of the project for the applicant's REF Unit of Assessment submission
- Where relevant, be sustainable and have the potential to leverage further income from external sources, or reduce costs, and therefore represent good value for money.
- Reference at least one of Creative Futures' guiding themes: Curation for the 21st Century; Translating Cultures; Arts & Digital; Access and Inclusion.
- Be accompanied by a Supporting Statement (maximum 500 words) provided by a senior academic (e.g. Head of Department or School, School or Departmental Research Director, etc.), which should confirm the suitability of the PI to undertake the project, and provide an assessment of how successful completion of the proposed project would contribute to your department's forthcoming or future Research Excellence Framework (REF) submission(s).

Funding Process:

On submission of a Project Proposal form and Delivery Plan, projects will be assessed by King's Cultural Institute in collaboration with an academic consultation group, which meets on a regular basis.
If you are unsure whether your particular project costs are eligible for funding, please contact Dorian.Hayes@kcl.ac.uk for advice. Please submit your Project Proposal and Delivery Plan to Dorian Hayes in the first instance.

KING'S College LONDON 1. **Academic Lead name and Department**	
2. **Project title**	
3. **Project partners**	
4. **Creative Futures theme** Explain which theme(s) your project speaks to and why. Eg., Curation for the 21st Century; Cultural Encounters; Arts and the Digital; Access and Diversity

Ideas Lab : Formal Notes from all sessions 1st March 2013

Creative Futures programme
Access and Diversity IDEAS LAB, Friday 1 March 2013
DISCUSSION NOTES

INTRODUCTIONS

Questions asked in the introductory session included: 'Why is the door still shut?' and 'Why can't we attract large audiences?' To what extent does 'unconscious bias' motivate policy decisions and participation? Is what ways have equalities been 'disarticulated'? Access and Diversity within architectural planning can involve banal regulations and box ticking. What might be the advantages of thinking more imaginatively about accessibility and space? What are the benefits of challenging and crossing institutional 'thresholds', and of reflecting institutions back to themselves? It was suggested that 'the concept of diversity changes depending on whom you are talking to'; what are problems and advantages of having a diverse concept of diversity?

DISCUSSION TOPIC: CHANGE-MAKERS-IN-RESIDENCE

Group members:

- Jenny Williams, Take the Space Consultants (email: takethespace@aol.com)
- Clare Lovett, Programme Director: Learning and Participation, Spitalfields Music (clare.lovett@spitalfieldsmusic.org.uk)
- Jocelyn Cunningham, Director, Arts and Society (Jocelyn@artsandsociety.co.uk)
- Julia Good, General Manager, Tamasha Theatre (julia@tamasha.org.uk)
- Nora Razian, Adult Programmes, Tate (nora.razian@tate.org.uk)
- Olowatoyin Odunsi, Associate Producer, Hat Factory, Luton (Oluwatoyin.odunsi@LutonCulture.org)
- Barry Peters, Infectious Diseases, St. Thomas' Hospital / Immunology, Infection and Inflammatory Diseases, School of Medicine, King's College London (barry.peters@kcl.ac.uk)
- Paula Serafini, Department of Culture, Media and Creative Industries, King's College London (paula.serafini@kcl.ac.uk)
- Zoe Norridge, Department of English, King's College London (zoe.norridge@kcl.ac.uk)
- Dorian Hayes, Partnerships Manager, King's Cultural Institute (dorian.hayes@kcl.ac.uk)

Discussion

JW proposed the idea of establishing a "change-makers-in-residence" initiative to address issues and challenges raised by the concerns around Access and Diversity in the cultural sector.

There was wide-ranging discussion of what such change-makers might do; how they might be embedded within arts and educational organisations; and how they might relate to exiting artists-in-residence schemes elsewhere in the sector.

Problems

Problems associated with artists-in-residence schemes identified by the group include the way selections of artists are made by organisations according to how artists are expected to package themselves by particular markers of identity (ie., "BME artists" often find themselves designated as such without their consent). Also, the kinds of works artists-in-residence may wish to produce might be at odds with the expectations of the organisations within which they are embedded.

Much of this is affected by the confusing mixed messages sent out by Government, commissioning organisations, cultural "gatekeepers", etc., about what they expect from artists and practitioners, particularly those from the BME community/-ies.

The question arose as to whose barriers are restricting entry? At what point is it reasonable to expect organisations to understand and address an artist as a human being, as opposed to an "identity" or a box to tick?

Opportunities
How might change-makers-in-residence alter these perceptions and create new pathways for artists and practitioners from all backgrounds to act within, and on, the cultural sector?

To what extent might these change agents be in a position to ask questions of organisations which the organisations are not able to ask themselves?

The perception of the group was that other sectors, such as private companies and corporates like Google and Facebook in the technology sector, might be more focused on recruiting the best / most skilled employees regardless of their background or ethinicity, etc. What kinds of alternative models and approaches of this kind might be drawn from the private sector by organisations within the arts and cultural industries? What might the practices of such companies be able to teach the public sector?

How might the cultural sector follow OO's lead at the Hat Factory in Luton by pursuing a "supermarket" approach to cultural programming, "segmenting" their audience(s), and providing something different for every kind of audience (or "buyer")?

What might be the relationship between the cultural sector and academia? ZN noted that the arts need high quality research focused on their outputs and impacts; while OO acknowledged that the arts can provide "live" case studies and evidence, rather than out of date examples for the academic researcher.

BP suggested that the embedding of a range of artists, practitioners, and other kinds of "change-makers" within his area of healthcare (Infectious Diseases at St. Thomas' / School of Medicine at King's) might help with the identification and communication of key messages about urgent health issues.

JC noted that the notion of change-makers-in-residence resembles earlier ideas of "catalysts" and "creative partnerships" which it might be timely and worthwhile to revisit.

Next steps
To develop a Creative Futures project based on the idea of embedding a cohort of change-makers-in-residence from the arts sector at an HEI like King', and / or within a healthcare trust like St. Thomas'; and vice versa.

DH to send out further details of the Creative Futures programme to the group, and to work with JW, OO, BP, ZN, and others to develop this proposition, and devise a stimulating and practical programme of work for the change-makers to deliver in response to specific challenges identified across either sector.

DISCUSSION TOPIC: ACCESS AND DIVERSITY IN THE ARTS AND ITS RELATIONSHIP WITH FUNDING AND FUNDING MODELS

Current Issues

Whereas there are many theatre groups and other artists doing fantastic work in catering for disabilities within their spaces, little is being done for elite art forms and main stream West End shows. One of the key challenges in doing inclusive programming for the disabled is that it is very costly. Current funding initiatives available provide little support. For many shows, providing for the disabled is limited to a signer at the side of the stage. With the advances in technology, elements which cater for the provision of a variety of alternative sensory experiences are possible. Current funding initiatives as they are, do not allow cultural producers to provide these as they would not receive enough funding to cover these types of costs. The recent staging of the Paralympics in 2012 has raised a great deal of interest in disability but this may prove like many other diversity issues, such as gender, race and ethnicity to be a passing fad which attracts attention for a short while, until the next big thing comes along. A key question for the organizations working on addressing issues of access and inclusion within the arts is "How do we sustain the current interest and awareness levels about disabilities?"

Ways Forward

Short to medium-term

- Other European countries which have pioneered successful initiatives in catering for leisure experiences for the disabled can provide some answers, as could cultural producers in cities in the United States which access private sector funding from corporations which sponsor inclusive initiatives as part of their corporate social responsibility portfolios.
- It may well be just getting one of the major theatres to take on the agenda, will show the way to others.
- Forging relationships with influential critics can help to drive main-stream interest in inclusive shows.
- Naming and shaming organizations for their lack of attention to disability may have its place as well.

Longer-term

- Legislation might well be needed to force the issue of access onto mainstream theatres.
- Training and re-education of cultural producers about disability may help.
- Partnering with education institutions which are interested in promoting access and diversity can help. They can introduce cultural producers to the importance of these issues e.g. the MA with the Globe
- Collaborative initiatives from organizations working on access and diversity may strengthen their effectiveness.
- Early education of children about the importance of inclusion is critical in changing current mindsets.

Possible Projects to be Funded by KCI

- Development of a training course on the provision of accessible/inclusive theatre programming could be a first step forward. There were programmers at the event with the skills and knowledge needed to inform others in their sector.

DISCUSSION TOPIC: MASCULINITY AND FEMININITY – WHERE IS THE DEFINITION AND WHAT DOES IT MEAN?

Group members:
Sue Parrish, Artistic Director, Sphinx Theatre Company
Jessi Pollack, Public Engagement Coordinator, Battersea Arts Centre
Bridget Conor, Department of Culture, Media and Creative Industries
Christine Scharff, Department of Culture, Media and Creative Industries

Language and understanding of "access and diversity" and "feminism"
SP: When looking at the term "Access and Diversity" who are we talking about? Who are we talking to? This could be directed at the artist, the community, the audience, as such, it is too loose a term. "Community" is often interpreted as ethnic community which makes the term pluralistic and at the same time glosses over problems within the "community" label.
Younger women don't readily engage in the history of sexism. Feminism should be brought back onto the agenda – feminism is not just a 1970s issue.

CS: There is a difference between academic and workplace view of sexism, for example, in opera women are not cast if over size 10 nor if over 35 years old despite their career starting at 30 years, which is accepted within the workplace.

JP: Racism is placed as an issue above sexism, ethnic minority women are more likely to address the race issue but back off from representing feminist issue.

JP: BAC programme around themes, this autumn "what is feminism?" Language impacts upon how this theme is received. BAC have had a more positive response by positing their theme as "what is feminism", as opposed to "feminism".

Roles for women in the creative industries (drama and classical music)
SP: Women are now more vocal in complaining about discrimination e.g. high profile actresses over 40 years engage in public debate about the lack of roles for women their age. Equity also tries to address this issue. Parts written for women in supporting roles are narrow and stereotypical, for example, popular Scandinavian dramas (e.g. *The Killing*) are misogynistic and present women as neurotic (see Sunday Times article). This is compared to *Scott and Bailey* TV series, written by Sally Wainwright, which normalises women and places them in positions of responsibility e.g. running a police station.

BC: Has conducted interviews with screenwriters regarding underrepresentation. Female screenwriters aspire to create multidimensional female characters, however they know that this work would not be picked up on a commercial level so write these parts for personal satisfaction only. In this way, screenwriters are also performers.

BC: There are tensions between teachers of drama, screenwriting etc, who are also trying to make a career in film and television for example, who are then competing against their students. This leads to feelings of guilt and complicity and it would be positive if there were more spaces opened up (in academia/research, in cultural institutions, in schools etc.) to talk about and share these feelings.

JP: Acting agents categorise "types" of women and influence which "types" are popular. Female actresses discuss with their agent how they fit into a particular type which perpetuates the cycle.

BC: Would it be helpful to set up women collectives where women can work together to create new plays / TV programmes etc for/by/with women?

CS: This model has been used in classical music, however, when an agency picks this up, they market the women as "sexy". In classical music gains are made by who you know and how well you fit in without causing trouble which creates barriers for women who want to challenge discrimination. Studies have shown that auditioning behind screens saw numbers of women hired rising by 25% in orchestras.

CS: Not all creative industries are the same, for example, the classical sector looks to the past e.g. study how Mozart was played at the time and be faithful to this representation; theatre can be more reflective of what is going in contemporary society so could attempt to address these issues creatively.

BC: The writers' room is an inherently masculine environment with masculine tropes and is another very closed/secretive place where sexism cannot be acknowledged or discussed e.g. drinking, late nights, combat. How can women work in the mainstream? Normalise in the mainstream?

SP: Writers should utilise resources e.g. professional, older women actors. As women, we have different types of women around us which can be used as the basis to write real, multidimensional, identifiable female characters. The arts sector knows of these issues, however, they have to work within the repertoire which has been programmed well in advance. Future investment is needed to create new works with women in central roles.

CS: Women only group could be problematic, however, a mentoring system might work.

Main points from the discussion:

- Legacy
  Feminism as a loaded political term
  Representation of women in the creative industries
  Voices of women and men – simply enabling more/diverse voices to be heard and shared.
- New generational attitude: Young women are aware that there are sexist / anti-feminist issues still prevalent in society, however, these women distance themselves from these issues by viewing them as separate to their own individual experiences in the workplace; this is an individualistic response to the collective issue of anti-feminist problems.
- Require new terms to encourage inclusivity beyond the terms "access" and "diversity".
- Play / screen writing by women for women which will require funding and forward planning with programming.
- Mentoring is key.

DIVERSIFYING THE WORKFORCE
Notes: Hope Wolf

We started by discussing large structural issues: leadership within both the university and cultural sector ('diversifying the top'); how economic inequalities mean that some are better placed to network than others (so have better opportunities). Do bigger theatres need to set an example and lead the way? What impact might educational policy have? How do we show primary school children that the Arts are for them? And how can this be achieved for all primary schools and not just a few?

We discussed funding criteria. Practitioners have encountered difficulties with the ways in which Access and Diversity funding is allocated: mainstream funding tends not to be allocated to Access and Diversity projects; the latter tend to be pigeonholed and compete for a small amount of allocated funding. Added to this is the issue that Access and Diversity projects (especially inclusive theatre) tend to require a great deal of funding and support in order to initiate and sustain them.

Do successful diversity projects always present themselves as diversity projects? Anu Giri described a successful project she set up that attracted diverse participants, although it wasn't specifically marketed as a 'diversity' project. This raises questions about the Creative Futures Access and Diversity theme: does the label limit the kinds of questions that are asked and the kinds of participants that are engaged?

Do 'Access and Diversity' labels bring people together in collective action; do they work towards inhibiting the normalization of diversity? Alby James raised the issue of making diversity ordinary (or of making people more aware that diversity already is ordinary). How might a particular project work towards this?

Jocelyn Cunningham suggested that a project that could work within the Access and Diversity theme might explore the idea of 'neutral space'. We discussed the problems involved in the idea, and rhetoric of, sending artists/organizations into cultural 'cold spots'. Is KCL a 'neutral space', or do we need to think more imaginatively about where we host our Creative Futures projects? Can 'neutral space' be constructed by creative practitioners? If it could be constructed, would this be desirable?

What can the university do? It was suggested (Alby James) that authoritative, rigorous research of current and past projects within the cultural sector would be most useful. A great deal of important work has been produced, but someone (who will be listened to) needs to document it, and help others to learn from existing models. My question would be: could there be benefits in pursuing a more dialogic approach: where academics and cultural sector practitioners work together, transforming/enriching how creative and research work is understood, produced, and presented?

DISCUSSION TOPIC: WE WANT MORE PERMEABLE/ACCESSIBLE SPACES FOR ARTS ACTIVITIES. HOW CAN WE WORK TOWARDS DEVELOPING THE PHYSICAL ENVIRONMENT?

Group Members:
Cui Yon Mok, Cultural Producer
Leon Robinson, Positive Steps
Pujan Gandhi, Freelance Curator and Art Consultant
Tony Thatcher, Programme Leader, Trinity Laban
Wendy James, Partner, Garbers & James Architects
Barry Peters, Infectious Diseases at King's
Katherine Bond, King's Cultural Institute

Discussion started with a question: if people were more aware of London's City Walls, would they take greater ownership of the area within? Conversation continued around how much the walls i.e. physical boundaries matter.

The overall focus of the discussion was around the notion of developing primary education schools i.e. teaching and learning, within museum settings. This appears to be a worthwhile avenue to explore given the 450,000 shortage nationally of school primary school places. Existing examples of learning in museum settings were discussed – New York Museum School, Langley Academy (Slough), Museum School Project (Bhopal) – as well as approaches to learning through 'Visual Thinking Strategies'.

It was agreed that we would need to provide the 'proof of concept' for education in cultural settings, perhaps through collaboration with Education & Professional Studies at King's, in order to make the case and develop this idea. The group discussed the fact that the first 'collectors' were/are children and therefore that 'collections' often begin informally.

Discussion moved onto public spaces more generally and how one can feel ownership of these. How do you feel or know that this is a space/place for you? How do you engage people to come into the space? Discussed the images reflecting what is going on in the spaces are particularly important – images that all people can identify with are required. Also discussed the curating of programmes and the need for these to come from a culturally informed perspective.

Agreed to take forward discussion and thinking around primary education in museum settings and thinking around 'imaging' institutions.

KB agreed to send an email sharing contact details for this group.

DISCUSSION TOPIC: MAKING HISTORIC ART COLLECTIONS ACCESSIBLE TO DIVERSE AUDIENCES

Group members:
Emma Rehm, The National Gallery
Dr Lisa Kingstone, Institute of North American Studies, King's College London

The discussion between myself and Dr Lisa Kingstone stemmed from our respective questions about making historic art collections accessible to diverse audiences and the possibility of engaging a group of young people in an 'identity guessing game' designed to explore the assumptions made about ethnicity and cultural identity based purely on what can be seen.

We considered how historic art collections, specifically portraiture, could be used for such an exercise and I shared examples of how the National Gallery's collection has been used to engage diverse groups, including young people, in exploring identity and developing visual awareness skills. We had quite a lengthy discussion about this.

Lisa shared information about a potential project this summer that would involve taking a group of young people to a museum/gallery to play an identity guessing game using the collection. We discussed the possibility of doing this at the National Gallery and considered some of the challenges and opportunities presented by using a collection of Western European paintings.

We exchanged details and have since made contact.

At the end of the day we asked everyone to put on a post-it note one thing they planned to do in the future, as a result of the discussions they had at the workshop, transcribed below:

The idea of the 'change-maker' in residence:

- Develop concept of change-maker as a programme of activity for diversifying the cultural sector workforce and challenging the existent power structure.
- Get some of the attendees to become 'resident change-makers' within the KCL Health School.
- Make connection with Barry Peters around idea of 'change-makers in residence'
- Think that I can become a change-maker within the cultural industry.
- Explore change-makers in more detail with the group.
- Catalysts/change-makers in health idea – meet Nikki about this in GSTT
- Put together change-makers in residence project: Make it happen!

Other notes from that group:
- Contact 3 attendees today/or everyone to be participants in my project.
- King's Cultural Institute: Renew old acquaintances, to discuss new/develop projects further.
- Nigeria 30 – connect with my new 18+ course (Nigerian poetry, theatre, journalism)

Project ideas
- Find a way to prove the educational concept that primary education would be enriched by taking place in museums and validated.
- Study best practice from the past as well as the present and seek out that with that knowledge – so as not to reinvent the wheel.
- I will look for examples of performers who are disabled and can be seen as role models.
- Disseminate my research findings on a blog – so practicing artists can use it!

Contacts:
- Talk to Jeremy Mortimer at BBC Radio Drama about participating in a research study about how the cultural change was achieved there in the 1990s.
- Keep connection with at least 10 people here.
- To continue the dialogue with a few of the researchers and creative practitioners in regards to how we can use live case studies of access and diversity in the arts.
- Make a connection with Nicole to discuss diversity and access.

Other plans/questions
- Raise mixed race actors/casting/programming at next artistic planning meeting.
- Go to Battersea Arts Centre – especially for their 'What is Feminism' showcase.
- Think about (Neutral) Space, and its relation to Access and Diversity issues.
- What are the existing barriers of entry and outreach?
- Make active steps to do this stuff and not just endless conversations about it where we say the same stuff.
- Start to think about a specific research project on inclusivity.

DISCUSSION TOPIC: WE WANT MORE PERMEABLE/ACCESSIBLE SPACES FOR ARTS ACTIVITIES. HOW CAN WE WORK TOWARDS DEVELOPING THE PHYSICAL ENVIRONMENT?

Group Members:
Cui Yon Mok, Cultural Producer
Leon Robinson, Positive Steps
Pujan Gandhi, Freelance Curator and Art Consultant

Wendy James, Partner, Garbers & James Architects
Barry Peters, Infectious Diseases at King's
Katherine Bond, King's Cultural Institute

Discussion started with a question: if people were more aware of London's City Walls, would they take greater ownership of the area within? Conversation continued around how much the walls i.e. physical boundaries matter.

The overall focus of the discussion was around the notion of developing primary education schools i.e. teaching and learning, within museum settings. This appears to be a worthwhile avenue to explore given the 450,000 shortage nationally of school primary school places. Existing examples of learning in museum settings were discussed – New York Museum School, Langley Academy (Slough), Museum School Project (Bhopal) – as well as approaches to learning through 'Visual Thinking Strategies'.

It was agreed that we would need to provide the 'proof of concept' for education in cultural settings, perhaps through collaboration with Education & Professional Studies at King's, in order to make the case and develop this idea. The group discussed the fact that the first 'collectors' were/are children and therefore that 'collections' often begin informally.

Discussion moved onto public spaces more generally and how one can feel ownership of these. How do you feel or know that this is a space/place for you? How do you engage people to come into the space? Discussed the images reflecting what is going on in the spaces are particularly important – images that all people can identify with are required. Also discussed the curating of programmes and the need for these to come from a culturally informed perspective.

Agreed to take forward discussion and thinking around primary education in museum settings and thinking around 'imaging' institutions.

KB agreed to send an email sharing contact details for this group.

New York City Museum School

Coordinates: 40°44'33"N 74°00'09"W

From Wikipedia, the free encyclopedia

The **New York City Museum School** (**NYCMS**) is a public school for grades 9–12 in Chelsea, Manhattan, New York City, United States.[1]

New York City Museum School

The NYC Museum School offers students access to primary resources in the sciences, history, literature and the arts. The unique use of museum collections enables students to examine evidence, illustrate ideas, provoke questions, and suggest new ways of presenting knowledge. Classroom instruction is reinforced with museum -based projects that are geared to state and local curricular mandates. Students explore, apply and create knowledge in the context of individual and group learning.

The school's curriculum requires weekly visits to museums all over New York City, where an NYCMS teacher conducts class in conjunction with Museum staff. These visits supplement conventional classes held inside the school.

NYCMS provides education to a heterogeneous group of students from a diverse community. The faculty includes licensed teachers and museum professionals who collaborate to design the curriculum.

The school partners with museums such as the Brooklyn Museum and South Street Seaport Museum

Our Mission

At The New York City Museum School (NYCMS), students come into contact with the passion of scholarship and the richness of primary resources in the sciences, history, literature and the arts. Museum collections offer evidence, illustrate ideas, stimulate curiosity, provoke questions, and suggest new ways of presenting knowledge. Classroom instruction is reinforced with museum-based projects that are developmentally appropriate and are geared to state and local curricular mandates. In these studies, students explore, apply and create knowledge in the context of individual and group learning. NYCMS is committed to providing a gifted education to a heterogeneous group of students who represent a diverse community and a range of academic experiences. The extraordinary faculty includes licensed teachers and museum professionals who collaborate to design these projects to support the intellectual, social, and emotional needs of the adolescent.

New building

The UCL Academy will be housed in brand-new, purpose-built accommodation on Adelaide Road in Swiss Cottage, North London.

The new buildings are specifically designed to support the curriculum and pastoral structures that the school will offer.

The Academy's facilities include:

- state-of-the-art science laboratories, and a science demonstration theatre for interactive lectures, experiments and talks by visiting academics from UCL;
- an engineering science suite, which will include workshops and technology and science labs (for electronics and for engineering physics) designed to give students the experience of 'being engineers';
- suites of rooms for art, music and drama, including highly-equipped performance spaces;
- 'House' spaces, providing comfortable, welcoming places for students to eat together, and to use for informal study during breaks and before and after school.

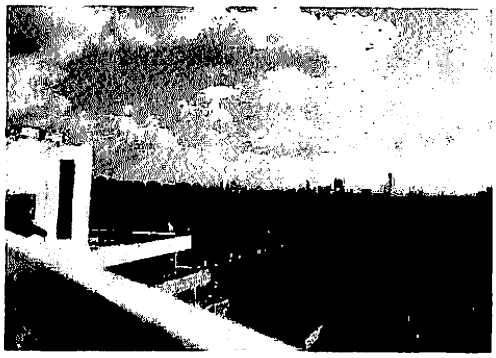

Much of a student's learning at the UCL Academy will take place in superstudios – large teaching areas which have been specifically designed to provide the best possible facilities for students to use for:

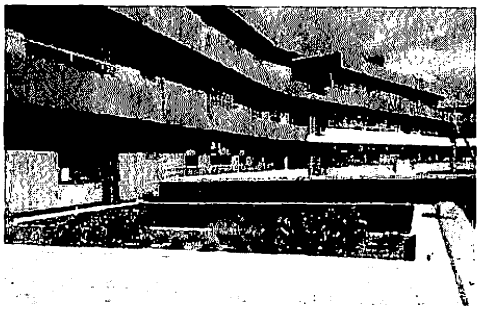

- classroom group learning
- project-based work and pair work
- work in small and large groups
- individual, independent study
- discussions and presentations

Take a look at initial plans for our new building, designed by Penoyre & Prasad:

Images of the outside of the building taken in October 2012 looking out over London from the main learning areas.

Emphasis on Mandarin at UCL academy

Filmmaking course £39...

0 Send Tweet 0 Share 0

Share

Tim Ross, Education Correspondent

Tim Ross, Education Correspondent

Anna Davis, Education Correspondent

22 September 2009

Pupils will have to study a modern language such as Arabic or Mandarin at a proposed academy sponsored by University College London

Unlike most state schools, the academy will require all children to study a language up to the age of 16 because UCL wants to make sure pupils grow up with a "global" outlook.

The UCL Academy in Camden, which is expected to open in 2011, will focus on languages that are important for business such as Mandarin. The proposals released last week are in public consultation and come as more private schools make the Chinese dialect compulsory.

Professor Michael Worton, UCL viceprovost, said: "We will not just be teaching French, German, Italian and Spanish but other languages, such as Arabic and Mandarin, which are important to business.

"Instead of having a geography class and a Spanish class, we might have a geography class taught in Spanish."

Languages will be compulsory for 11- to 16-year-olds and sixth-formers will be encouraged to continue studying. Pupils will also form links with schools overseas. The consultation plans said: "Knowledge of a foreign language is a vital element of a broad education."

The school will also run after-hours clubs as "masterclasses for the gifted and talented" and encourage pupils to do community voluntary work.

BIOGRAPHIES

JANIE CHESTERTON

Education Sector Director, Willmott Dixon Construction

Janie was appointed head of Willmott Dixon's education sector in 2011. She is responsible for refining and developing the company's education offering, providing strategic leadership on future direction and co-ordinating its relationships with the EFA, framework partner Scape, local and central government as well as other school providers. Janie brings experience from being a Commercial Manager at PfS. She is a primary school governor as well as a director on the boards of the Cabot Learning Federation and the West Midlands Construction UTC.

NICK EVANS

Director, ECE Architecture

Nick studied architecture at the Architectural Association and then at the British School in Rome. He founded Nick Evans Architects in 1992 which evolved into ECE Architecture in 2010. Nick is interested in all aspects of architecture and design, with a particular emphasis on public buildings, having won a range of design awards. Nick was made an Honorary Fellow of the University of the Creative Arts for his architectural leadership on several projects on their Farnham campus.

CLIVE GRIMSHAW

Interim Head, Children and Young People's Services, London Councils

Prior to joining London Councils, Clive was Chief Executive of a national training provider in the health and social care sector, providing training on attachment and trauma theory to a wide range of professionals working with children and young people. Clive began his career in children's policy at the Local Government Association, where he worked between 2004 and 2009. Before 2004, Clive worked for a number of local authorities in democratic services.

MAGGIE HARRIOTT

Education Strategy Manager, Education Estates and Capital Projects, LB Lambeth

Maggie has been involved in education for over 30 years. Born and educated in Northern Ireland she moved to England to pursue her teaching career in the mid 70s and has worked in secondary schools in the south of England. She was a head teacher in Kent for nine years followed by becoming an independent consultant on school improvement, leadership and management. Maggie became involved in PFI and BSF school building schemes nine years ago and is now Education Strategy Manager for the LB Lambeth and the educational drive behind all Capital School projects.

ROGER HAWKINS

Director, Hawkins\Brown

Roger founded Hawkins\Brown with Russell Brown in 1988 and is a firm believer that good architecture needs to address a social agenda and is always keen to promote user needs and aspirations. This approach is particularly appropriate in the education sector and Hawkins\Brown have completed several Award winning School Buildings. Roger is a member of the Mayor's Design Advisory Group and lectures at architectural schools, conferences and writes for the architectural press and has lectured recently at UCL Bartlett and Sheffield University.

MAIRI JOHNSON

Deputy Director, Design, Education Funding Agency

Mairi is an architect who worked in private practice for eight years before joining the public sector. She was appointed as Director of Design and Sustainability at Partnerships for Schools, now part of the DfE Education Funding Agency, at the end of 2008. Since joining the education sector Mairi has worked on setting up and implementing the Minimum Design Standard for BSF schools, post-occupancy evaluation of completed schools, rationalising school premises regulations, and implementing the recommendations of the Zero Carbon Task Force and the James Review of School Capital, including developing baseline design information.

MUNIRA MIRZA

Deputy Mayor for Education and Culture, GLA

Munira has worked for a range of cultural and charitable organisations including the Royal Society of Arts, the independent think tank Policy Exchange and Tate. In 2009 she completed her PhD in Sociology at the University of Kent. She has written extensively about cultural and social policy in the UK. Munira is a member of Arts Council England, London Regional Council; the Royal College of Music Council; and the boards of the Institute of Contemporary Art and the Cultural Olympiad.

PETER MURRAY

Chairman, NLA

Peter trained as an architect and was editor of Building Design and RIBA Journal before starting Blueprint Magazine in 1983. He has curated a number of major architectural exhibitions and is Chairman of the communications consultancy Wordsearch. He is founder of both NLA and the London Festival of Architecture and is author of various architectural books including "The Saga of Sydney Opera House" and "A Passion to Build". He is a Visiting Professor at IE University in Madrid and Hon. Sec. of the Bedford Park Society.
Twitter: @pgsmurray
blog: www.petermurray.co

DOMINIQUE OLIVER

Director, Pollard Thomas Edwards architects

Dominique trained at the Bartlett School of Architecture and qualified in 2001. She joined PTEa in 2004 and was appointed Director in 2010. She leads the practice's growing portfolio of projects in the education sector. Dominique has a special expertise in education projects, including the co-location of schools with commercial, community and residential uses to generate mixed-funding and create thriving neighbourhoods. She is skilled at working with a wide range of stakeholders, encouraging contributions from all parties to unlock complex briefs and sites.

FINN WILLIAMS

Deputy Team Leader Placemaking, LB Croydon

Finn's responsibilities at Croydon Council, amongst others, are coordinating urban design input on school building projects. He is also the founder of Common Office, chair of the Friends of Arnold Circus, and vice-chair of the Tower Hamlets Design Review Panel. Finn sits on the Architecture Foundation Curatorial Advisory Board, the advisory panel of the British Pavilion at the 13th Venice Architecture Biennale, and is a specialist urban design advisor at the Bartlett School of Architecture.

INFORMATION FOR DELEGATES

BADGES

For security reasons, and as a courtesy to other delegates, please ensure that you wear your badge at all times.

MOBILE PHONES

Mobile phones must be switched off at all times whilst in the conference room.

Q&A SESSIONS

Please wait for the microphone to reach you and state your name and company name before asking your question.

PHOTOGRAPHY

Please note that photographing or filming any part of the event is strictly prohibited without the prior consent of the organisers.

FEEDBACK

NLA greatly values your opinion and would appreciate your help in completing our feedback form, which will have been handed to you with this delegate pack.

CLOAKROOM FACILITIES

A cloakroom is provided on the lower ground floor, opposite the seminar suites. All belongings are left in the cloakroom at the owner's risk. Please keep your working materials with you at all time. NLA cannot be held responsible for any loss or damage to your property.

CATERING

Break time refreshments will be provided. If you have made any special dietary requests prior to the day, catering staff will be able to assist with these.

SMOKING

The Building Centre is a non-smoking building.

DISABLED ACCESS

Disabled access is available via the main entrance and throughout the building. Disabled toilets are provided on the lower ground floor lift, opposite the seminar suites.

TOILETS

The toilets are situated on the lower ground floor, opposite the seminar suites.

ENQUIRIES

Conference staff are on hand to help with any queries or requests.

FIRE INSTRUCTIONS

The following details must be read by all delegates before the conference begins. Please take a few moments to familiarise yourself with the escape routes and the action to be taken in the event of fire or if the fire alarm is sounded. In an emergency please alert a member of conference staff or contact the main receptionist on the Ground Floor on 020 7692 4000.
The Building Centre/Seminar suites and surrounding areas are designated as NO SMOKING (No naked or open flame appliances are permitted).

ACTION ON HEARING THE ALARM

- Follow the instructions from a member of the conference management team or Fire Wardens
- Leave the seminar room by the nearest Fire Exit
- Follow the signs to the Final Exits
- Leave the building in an orderly manner

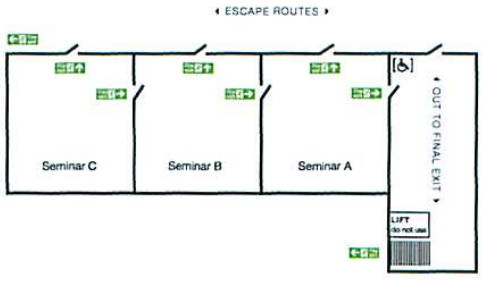

DO NOT RUN

DO NOT USE THE LIFTS

DO NOT STOP OR RETURN FOR PERSONAL BELONGINGS

ALL DELEGATES SHOULD MEET ACROSS THE ROAD OUTSIDE THE COLLEGE ARMS PUBLIC HOUSE FOR A ROLL CALL

This will ensure that the emergency services and Fire Wardens are notified of any missing persons.
Please inform a Fire Warden or the Emergency Services if you know or suspect a person is still in the building. DO NOT return to the building yourself to check or look for the person.

New London Architecture

London's School Building Crisis – Filling the 90,000 Gap

Solutions - Cutting Build Costs

Janie Chesterton

Education Sector Director

Willmott Dixon Construction

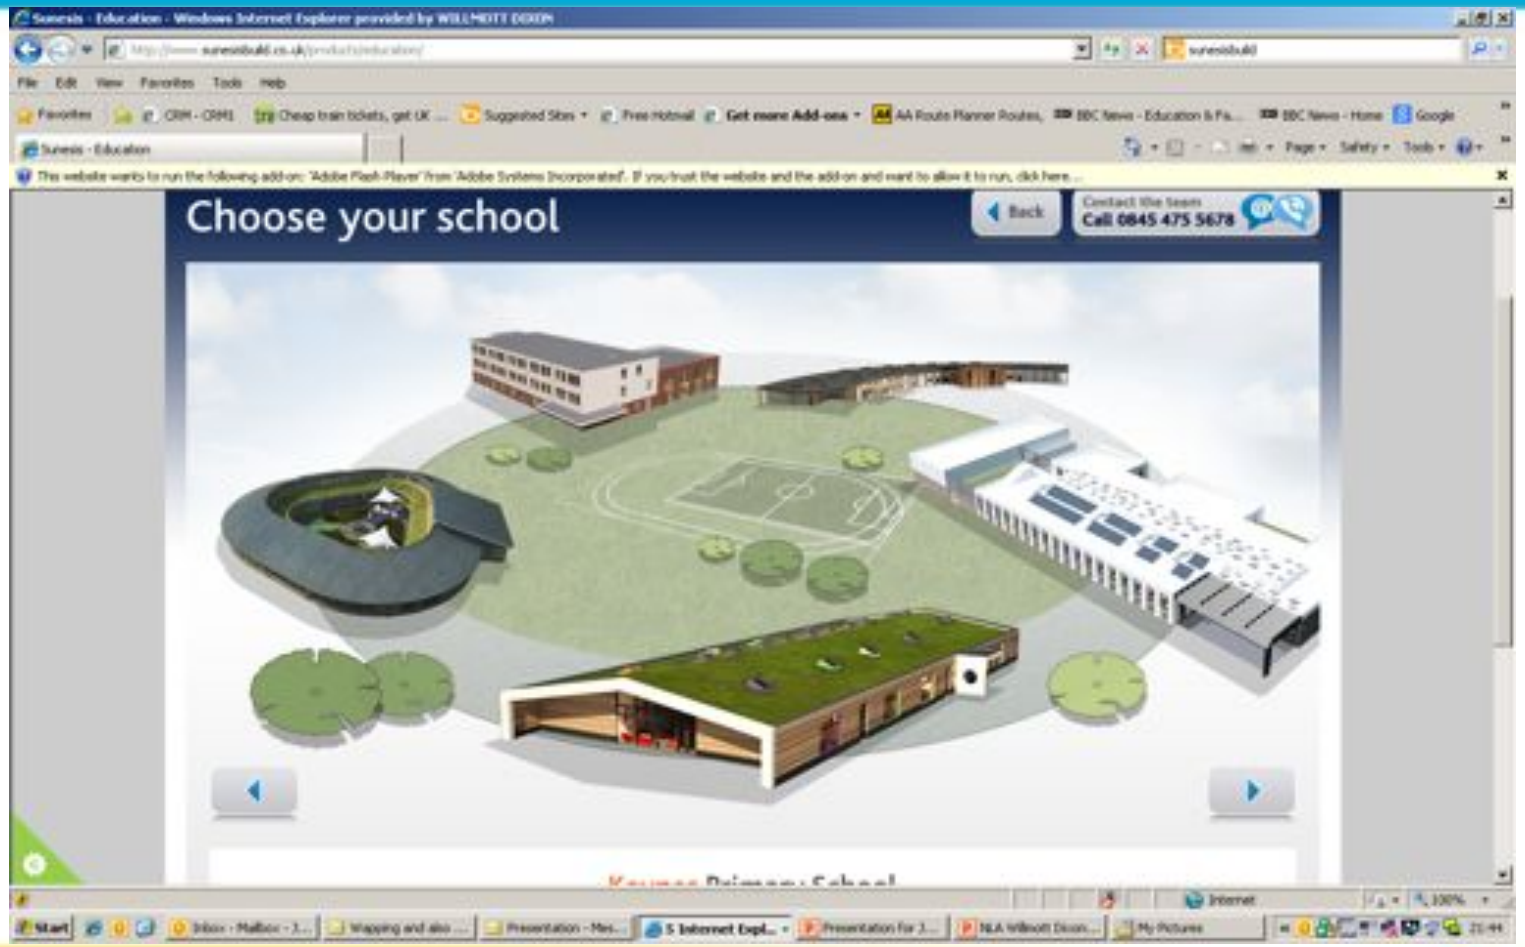

The Context

- The Demographic Time Bomb
- The “More for Less” Agenda
- Lessons Applied
- So, what did we do?

The Solution(s)

- JV with Scape - Sunesis
- Joining together of swifter procurement and pre-designed suite of schools
- New schools as well as extensions
- Strip out non essential items
- Refurbishment and retrofit still necessary at times – no 'one size fits all'

Options – Choose Your School

Sunesis - Keynes

EDUCATION

School Extensions - Connect

STANDING OUT FROM THE CROWD

WILLMOTT DIXON CONSTRUCTION

EDUCATION

Tailored Design – Free Schools

Summary

- Standardising designs is a sensible solution to the current economic agenda
- Standardised need not mean poor quality, utilitarian
- Strip out non essential costs
- Variety of solutions
- Savings on cost and programme – releases funds for additional ‘bricks and mortar’

- Politically led, but cross-party

"*London Councils is committed to fighting for more resources for the capital and getting the best possible deal for London's 33 local authorities*"

LONDON COUNCILS

School Population Growth

- Story so far 2001-2011
  - Children 0-19:London +12%, England +3%
  - Birth rate in London +27%
- The future 2012-2020:
  - Primary and Nursery: England +18%
    - Biggest cohort since 1970's
    - London +18% by 2015
  - Secondary: England 2015 -2%, 2017 +1%
    - London +4%
    - London +10%

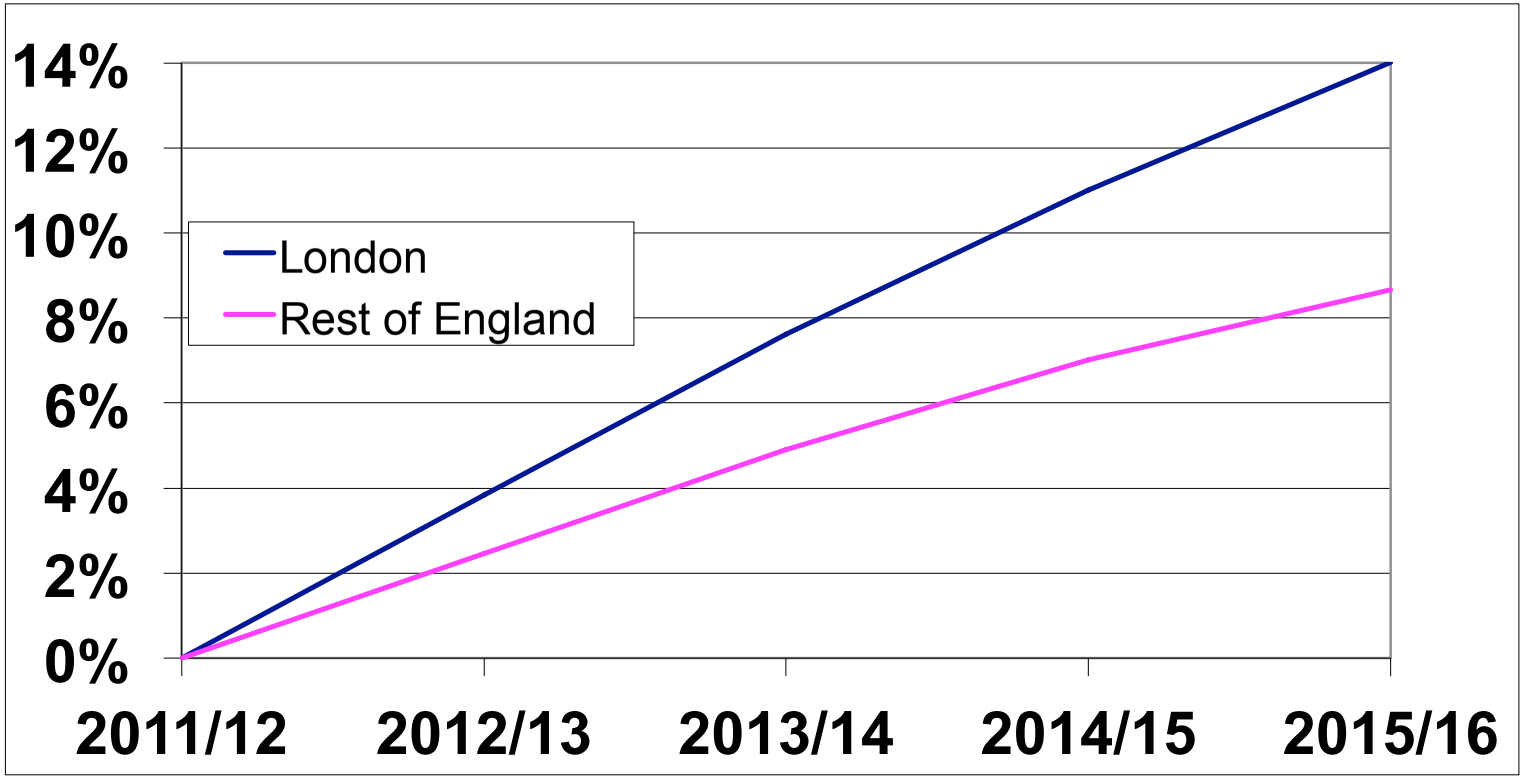

School Population Growth

- Factors influencing growth:
  - Economic conditions
  - Increasing birth rates
  - Local circumstances

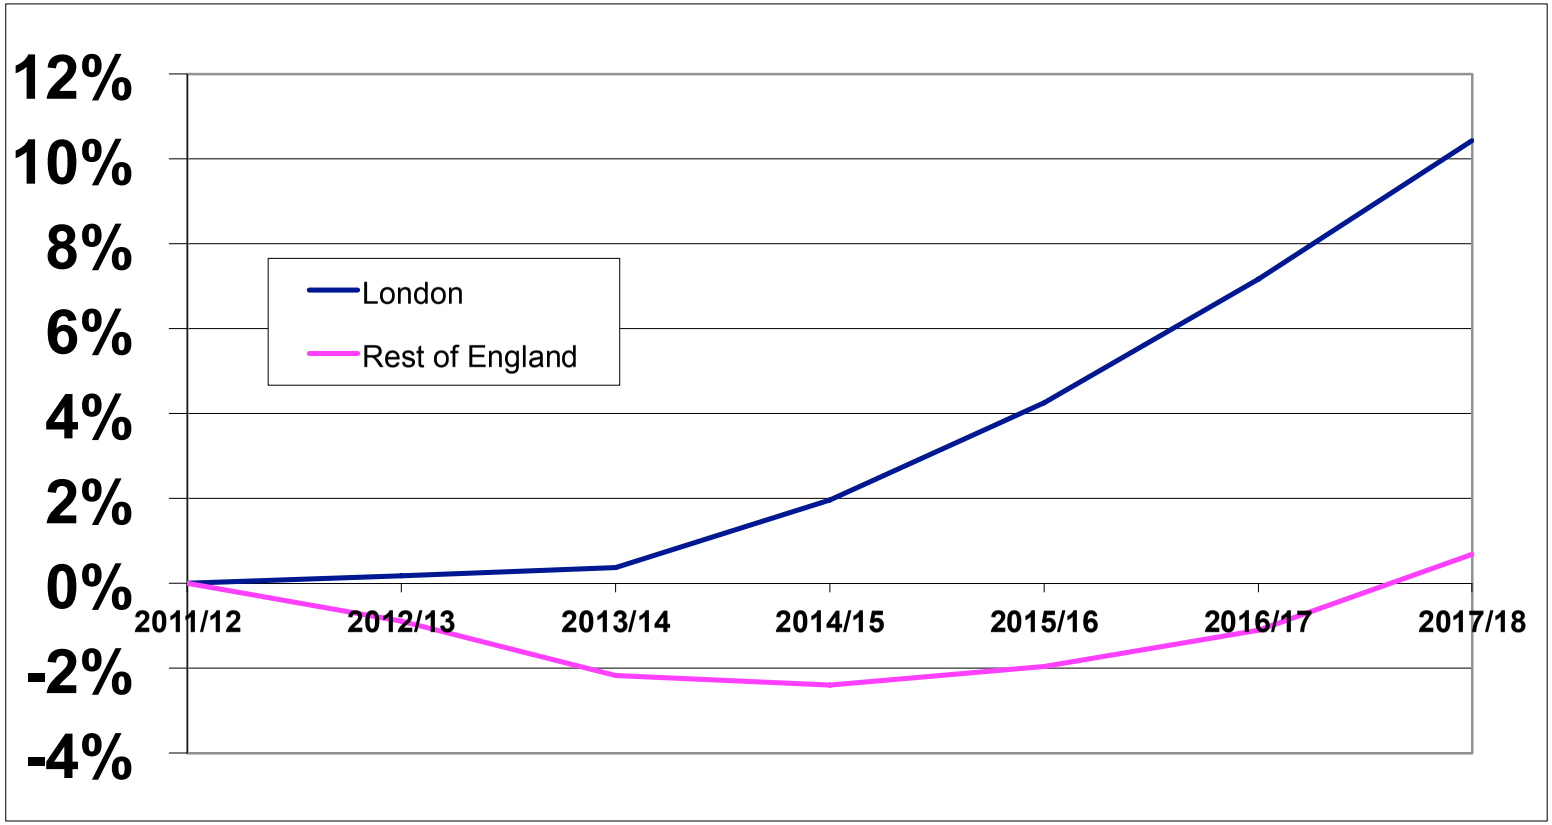

- Mustn't underestimate the importance of local circumstances!

Rising school rolls

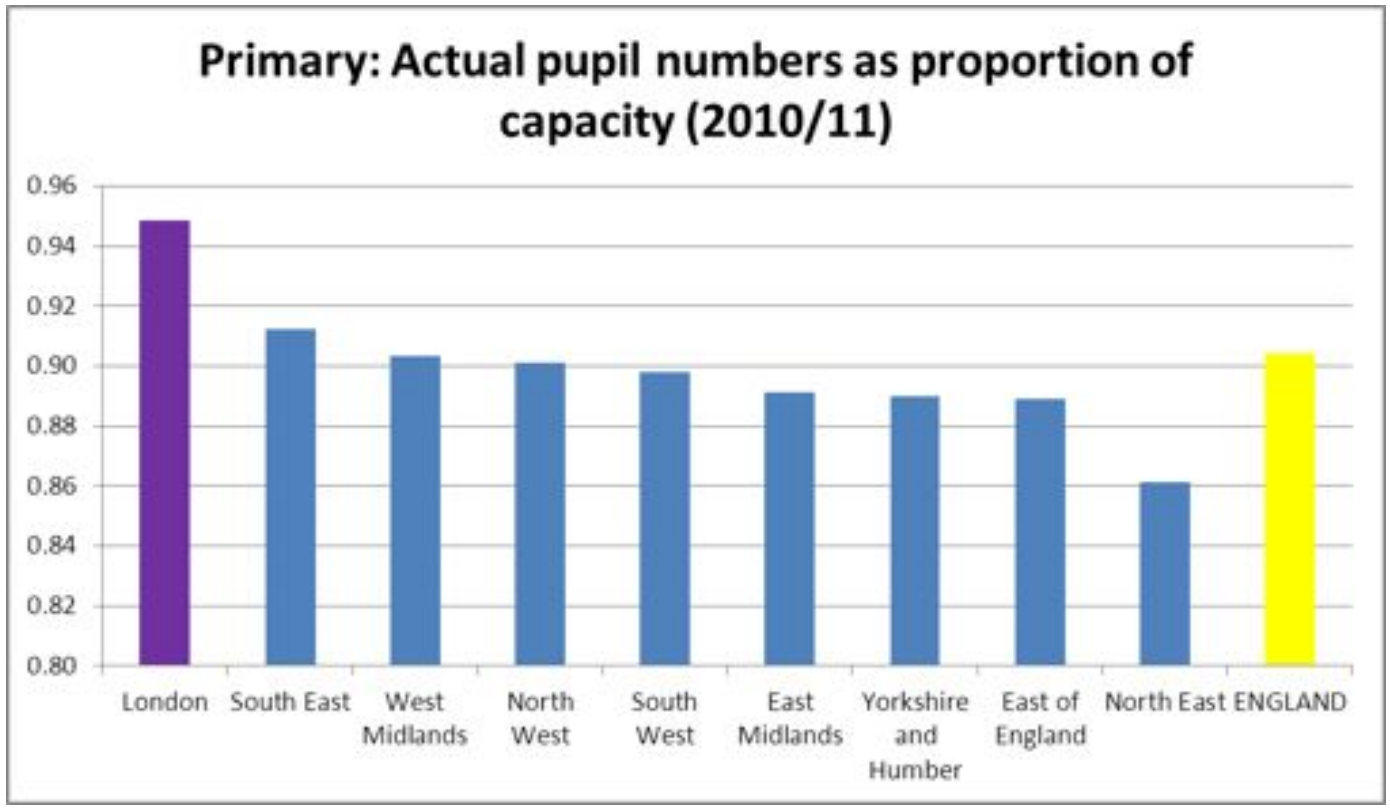

- Pupil roll growth - Primary

Pupil roll growth - Secondary

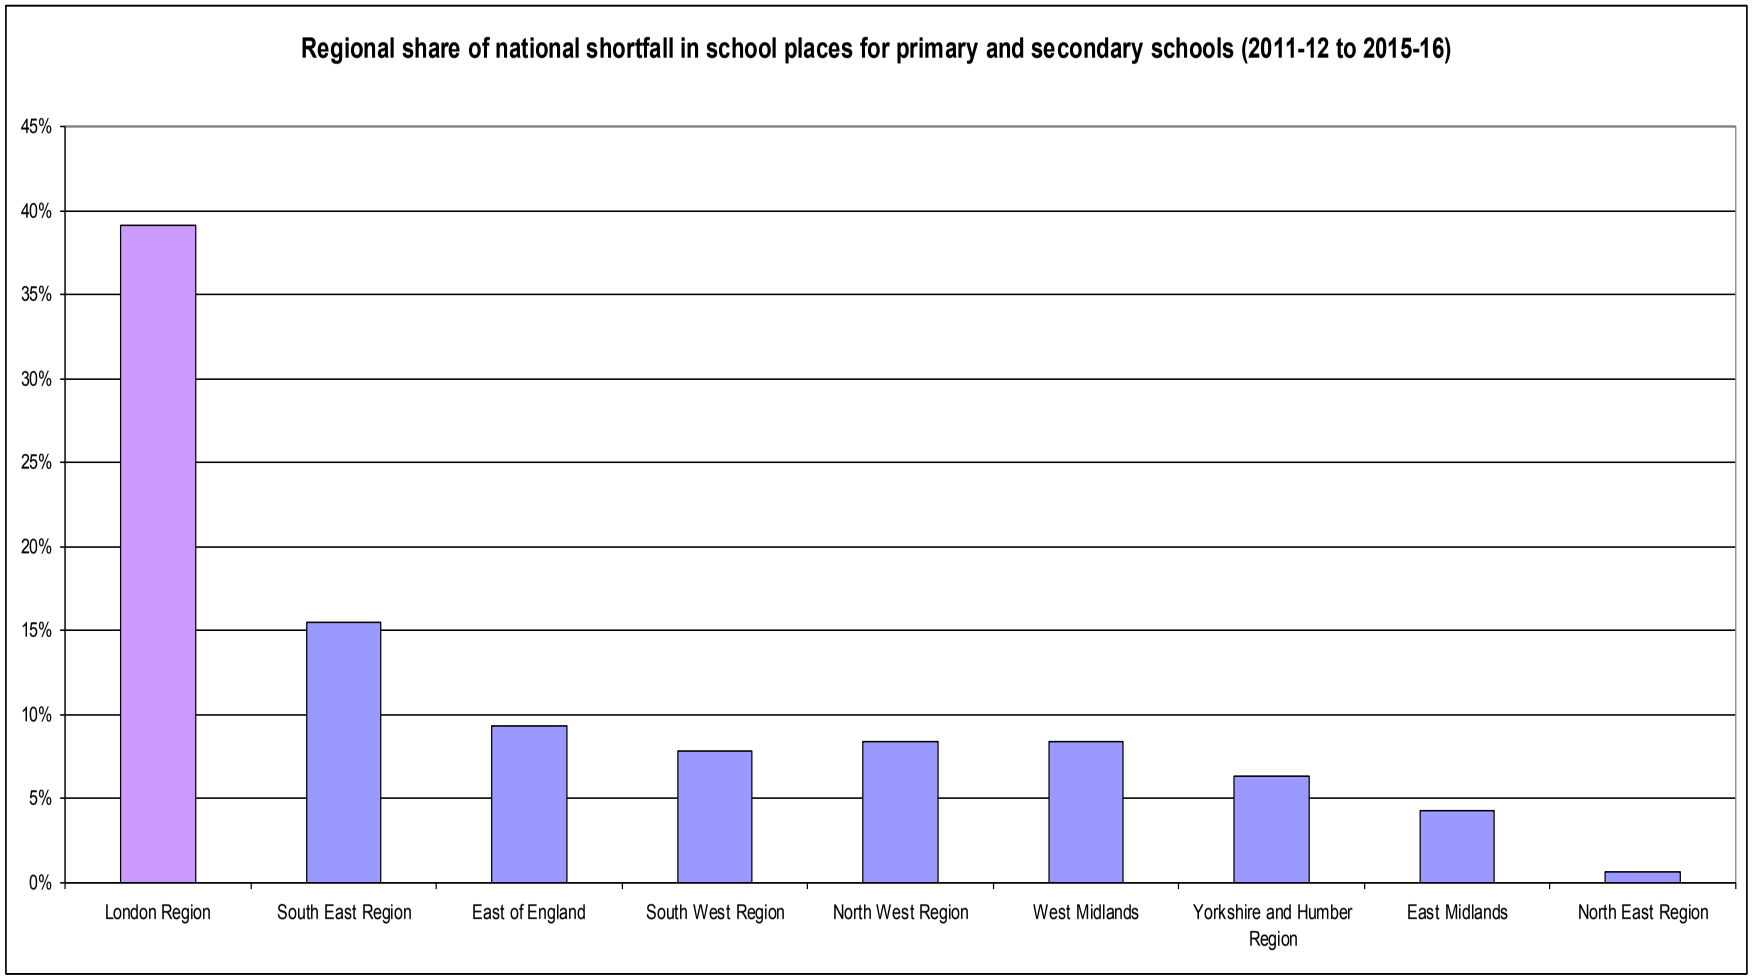

Existing capacity at breaking point

Problem is much more acute in London

Predictions of future need: 90,000 extra places

	2011-12	2012-13	2013-14	2014-15	2015-16	Total
Primary	-9,228	-14,604	-18,230	-18,928	-17,933	-78,923
Secondary	-2,455	-1,336	-1,107	-2,628	-4,701	-12,227
Total	-11,684	-15,940	-19,337	-21,556	-22,634	-91,150

School Building finance

- Priority Schools Building Programme: £2bn aimed at dealing with condition of some schools.
  - London has 46 of the 261 schools announced.
  - Delivered through PFI
- Basic Needs capital
  - For 2013-15 the total allocation is £1.6 billion, with London's share at 36%
- Targeted Basic Need funding
  - £982 million national pot for 2013 – 15 – bidding process ongoing, but funding comes with strings

LONDON COUNCILS

Schools Diversity London

- August 2010: 41 academy schools
  - secondary schools only
- December 2012: 300 academies
  - includes 211 secondary, 73 primary, 7 special schools , 9 all through 11-18
- November 2014 academies forecast:
  - 100% secondary schools
  - (100% primary schools by 2025)
- Free Schools growth:
  - 65 expected by September 2013
  - One third of England total

The challenge in London

- London is unique in this context, including:
  - Population growth
  - Operating a high capacity historically
  - Low hanging fruit already taken
  - New capacity more complicated and harder to deliver quickly
  - Local cost drivers

London Councils' Strategy

- Publicising the case for London:
  - 90,000 shortfall
  - £2.3 billion needed 2011/12 to 2015/16
- Influencing DfE methodology:
  - Impact of capacity gap, variables across the capital and refining the methodology
- Investigating innovative design:
  - Looking to the market for innovative and efficient design solutions
- Working with Free schools:
  - Targeting Free school capacity to areas of need

Education Funding Agency

Free Schools in London

- 28 Free Schools open in London
- 10 from 2010, 18 from 2011
- 34 planned to open in 2013
- Of 2014 applicants, 40% were in London

Education
Funding
Agency

Priority School Building Programme in London

- 45 schools all together
- 20 secondary, 23 primary, 1 PRU and 1 special
- 7 D&B delivered through capital
- 37 delivered through private finance
- Capital batch is already underway
- All PF batches underway by 2015

Education
Funding
Agency

Efficiencies – capital and private finance

- Encouraging standardisation
- Batched procurements
- Reduction in procurement time
- Keen use of space

Education
Funding
Agency

Baseline designs

- Aim to demonstrate what can be achieved within area and cost constraints
- Will demonstrate how a wide range of school-specific requirements can be accommodated
- Will match typical SoAs for a range of school sizes (so far for a 420 primary and 1200 secondary)

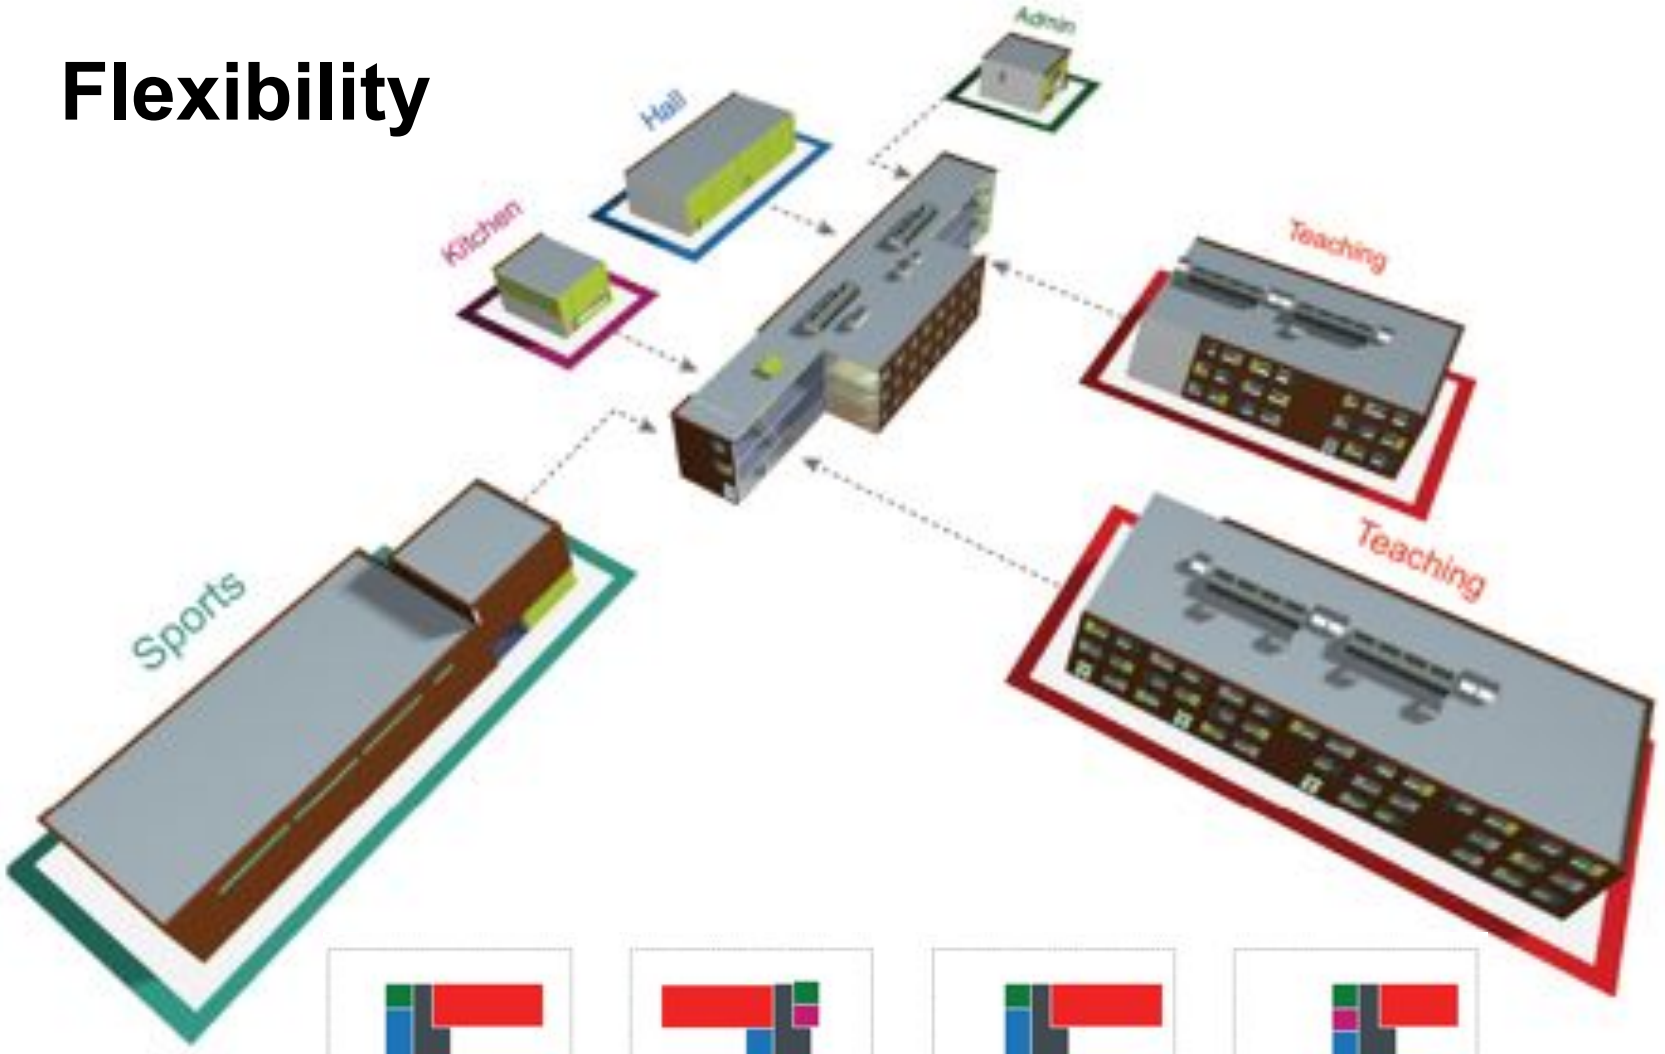

Secondary 1200
11-16

Education
Funding
Agency

Flexibility

Education
Funding
Agency

PF2 reforms designed to eliminate waste, improve efficiency and align public and private incentives

- Investment of public sector equity;
- Restricting the Contractor to providing Hard FM only (and removal of soft services to a great extent);
- Additional requirements in relation to the transparency of operational and financial information;
- Lifecycle – gain (but not pain) sharing in relation to lifecycle surpluses;
- Retention of risks by the public sector which are more appropriately managed by them (e.g. capital costs as a result of General Change in Law risk during the Services phase);
- Setting out proposed approach to new sources of investment and finance to the PFI market.

PF2 – changes to specification

- Temperature – adaptive thermal comfort
- Ventilation – teaching spaces cross ventilated
- Lighting – Climate based daylight modelling
- Acoustics – new build same as before but slightly relaxed standard for refurbished buildings
- Energy consumption risk

Education
Funding
Agency

Baseline designs – internal environment

- Design uses natural ventilation and daylight as much as possible
- Comfortable to work in – tackles overheating
- Simple to operate – users can easily adjust the temperature and the ventilation

CANAL

Conclusions and Considerations

- Maximises use of valuable urban land
- Cross-subsidy of 'air-rights'
- Schools can retain 95% of existing site area
- Shared management costs
- Enhanced 24-hour surveillance
- Enhanced integration with the community
- Potential homes for key workers

Conclusions and Considerations

- More complex development process
- More lengthy process
- More complex construction and some constraints on school layout
- More complex management arrangements
- Potential overlooking or other nuisance between different uses
- Reduced long-term flexibility of site use

Final thought

15 = 90,000 = 63

Bits The Business of Technology

FEBRUARY 27, 2013, 5:53 PM

One on One: Sugata Mitra, 2013 TED Prize Winner

By JOSHUA BRUSTEIN

Are teachers keeping students from learning in the digital age? Sugata Mitra, a professor of educational technology at Newcastle University, believes so. Dr. Mitra is best known for an experiment in which he carved a hole from his research center in Delhi into an adjacent slum, placing a freely accessible computer there for children to use.

The children quickly taught themselves basic computer skills. The "hole in the wall" experiment, as it is known, led Dr. Mitra to develop the idea of learning environments in which teachers would merely be supervisors as children taught themselves by working together at computer terminals. On Tuesday Dr. Mitra was given the 2013 TED Prize, which grants him $1 million to build a learning laboratory based on this principle.

Q.

What did you learn from the original "hole in the wall" experiment?

A.

The first thing to point out is that it was done 14 years ago, at a time when few children in India had access to computers. I noticed the rich parents saying that their sons and daughters must be gifted, because they were so good with computers. And since we know that gifted kids are not born only to rich parents, why would there not be similar children in the slums? I was curious to see what would happen if I gave an Internet-connected computer to the kind of kids who never had one.

We noticed that they learned how to surf within hours. It was a bit of a surprise. Long story short, they would teach themselves whatever they had to to use the computer, such was the attraction of the machine.

Q.

What does this mean for education?

A.

In those days, the main question was what does it mean for training, because back then people were trained to use computers. So I said it looks like we don't have to do that.

But I got curious about the fact that the children were teaching themselves a smattering of English. So I started doing a whole range of experiments, and I found that if you left them alone, working in groups, they could learn almost anything once they've gotten used to the fact that you can research on the Internet. This was done between 2000 and 2006.

I came to England in 2006, and the schools said, why aren't you doing it here? So I did, and I realized that what I've got has nothing to do with poor children. It probably is just a new way in which children learn in this new environment. It needs two things. First, broadband. That's fine, everybody loves that. The second thing is, it needs the teacher to stand back.

At first I thought that the children were learning in spite of the teacher not interfering. But I changed my opinion, and realized this was happening because the teacher was not interfering. At that point, I didn't become entirely popular with teachers. But I explained to them that the job has changed. You ask the right kind of question, then you stand back and let the learning happen.

Q.

Do schools need to be radically changed to implement this, or is this a technique that fits into the current structure of schools?

A.

At the moment I pitch it as a technique that you can bring into your schools. But that's not the real story, which is that the current schooling system is a leftover from the Victorian age of empire. In that world, there were no computers, no telegraphs and data was carried around on ships. This meant that the pillars of education were reading, writing and arithmetic. That age is gone. The system was wonderfully engineered, but we don't need it anymore; we need something else. But you can't just say that without saying how you do it.

What I'm doing is I'm putting my foot in the door by saying here's a new way. Try it. If you're happy with it, then I'll say let's look at the curriculum top to bottom. If we can convert the curriculum into big questions, if we can turn assessment into peer assessment, then neurophysiology tells us that learning gets enhanced. Finally, if you add admiration — what I call the grandmother's method, where you stand behind and encourage them. Put all of this together and you get a new way to do schooling.

Q.

So it seems that you're saying we don't need teachers at all.

A.

We need teachers to do different things. The teacher has to ask the question, and tell the children what they have learned. She comes in at the two ends, a cap at the end

and a starter at the beginning.

Teachers are not supposed to be repositories of information which they dish out. That is from an age when there were no other repositories of information, other than books or teachers, neither of which were portable. A lot of my big task is retraining these teachers. Now they have to watch as children learn.

Q.

Is there a problem with this in that it will serve the good students well, but leave those who need more coaching behind?

A.

Well, yes, to some extent. But there are some interesting things about children working in groups if those groups are self-made. Once you let children do that, the system has a self-correcting ability. Having said that, will there be good students and bad students? Of course.

Q.

Does this work for all levels of instruction?

A.

It doesn't work the same way with adolescents, and definitely not with adults. With 8- to 12-year-olds, that's the age where big questions turn them on.

Q.

What are your specific plans with the prize?

A.

In order to see if this sort of self-organized learning environment is suitable I need to have one in which I have some control over and can do measurements with. So I want to build one of these learning spaces somewhere.

It will be totally automatic, completely controlled from the cloud. There will be a supervisor, but that person is not going to be a computer expert or a teacher in anything. She — and it will probably be a she — will be there only for health and safety requirements.

The rest of the school, if we call it a school, is a facility that I can hand over to a mediator from the cloud. She logs in from her home, wherever her home is, and she's able to control everything inside, the lights, the air-conditioning, you name it. Then there are four mediators who Skype in and use the pedagogical method. That's going to take a lot of work.

The second bit is that schools all over the world have been using this method. We need

to do a massive multiplication, and TED is going to help me do that. I am going to try to put that into homes; get your children and their friends together. Then, every time they do it, I'll ask them to collect data and send it to a Web site. If I succeed, in two years I'll have massive data from all over the world. By that time I'll be done building the facility and I'll be ready to build a new model.

Q.

Where do you think this school will be?

A.

I'd like to do it in India, because I'd know how to get it done. There will be less of a learning curve, I know who the contractors are, and I know how not to get cheated. So I'd like to do it there, but it's not set in stone.

Museum Practice

Virtual object handling

Rebecca Atkinson, 15.02.2013

Can virtual objects replace the real thing?

Many objects are not suitable to be handled – they might be too big, too valuable, too fragile or too rare.

But advances in technology mean it might still be possible for such artefacts or artworks to be "touched".

For example, 3D printing – the process of making a three-dimensional solid object from a digital model – is already possible. The most well-known museum example is the Smithsonian in the US, which has created 3D replicas of objects to lend to other museums – including a full-scale statue of former president Thomas Jefferson.

In the UK, Loughborough University has been pioneering 3D printing, with a project to create a 3D replica of an inscribed Egyptian tablet at Manchester Museum. The university has also worked with Beijing's Forbidden City's Palace Museum to create 3D replicas of damaged relics than can then be restored.

The Fitzwilliam Museum in Cambridge has also created 3D copies of its collection, in association with Feathercast and Inition, but these are designed to be sold in the museum's shop rather than used for display or educational purposes.

The potential for 3D printing in museums for handling purposes is enormous, although there are cost implications. There is also a question of whether replicas (produced using 3D printing or otherwise) provide the same "touch" experience for visitors as the real thing.

Virtual objects

Manchester Museum has recently started offering virtual object handling opportunities in its galleries and out in the community.

With funding from the Stavros Niarchos Foundation, it has created two booths that allow people to "touch" virtual objects using a haptic interactive technology– in laymen's terms, a touch-enabled computer system that creates replica objects within a 3D digital environment.

Virtual object handling is hard to describe – or, indeed, to understand if you have never tried it.

At Manchester Museum, the portable booth includes a screen where the virtual objects can be "seen", and a handle in the form of a ball. The handle controls a cursor that moves freely in the 3D interface. When this cursor collides with an object or wall, the user experiences physical resistance, and a sense of that object being a real object.

Although the haptic interactive doesn't provide a sensory experience of touch in the same way that our hands do, users can begin to explore and understand shapes. Depending how sensitive the system is, small details, such as a crack in a bowl, can be felt.

The system at Manchester Museum was developed with Christopher Dean, director of Touch and Discover Systems with a focus group from Henshaws Society for Blind People.

The focus group choose three objects to be recreated in the virtual space – an Egyptian Shabti, a Greek jug and a pre-dynastic hippo bowl.

Although developed with blind and visually-impaired people in mind, the system can be used by anyone.

Sam Sportun, collections care manager and senior conservator at Manchester Museum, says feedback has been mixed: "The panel from

Henshaws were very happy with the technology, and we find that children instinctively seem to understand it. But unless visitors sit down and spend time exploring the space and the controls then it can feel a bit unrewarding."

Although it's early days for virtual object handling, the booth at Manchester Museum means that objects completely unsuitable for handling by the general public can be felt, in some sense at least.

Sportun says it's not about trying to replace the authentic experience – but it does mean the possibilities for access are greater than current conservation standards allow.

Milwaukee Art Museum: Teacher Resources

Welcome! View resources for educators below, or learn more about this site and plan your visit.

Visual Thinking Strategies (VTS)

Visual Thinking Strategies (VTS) is an inquiry-based teaching strategy for all grade levels. You do not need any special art training to use this strategy. The goal of VTS is not to teach the history of a work of art but, rather, to encourage students to observe independently and to back up their comments with evidence.

How to do VTS

1. Project artwork. Choose a work that is not abstract.
2. Ask students to look closely and silently at it for a minute or two.
3. Three questions guide the discussion.

- Open with: **"What's going on here?"**
  Summarize student responses using conditional language ("Raoul thinks this could be…"). This keeps the conversation open to other interpretations by other students.
- If appropriate: **"What do you see that makes you say that?"**
  This encourages students to back up their statements with things they see in the work of art.
- Ask the group: **"What more can we find?"**
  This continues the conversation.

Tips for doing VTS

- During discussion, link responses together—compare and contrast what other students have said.
- Avoid inserting information. Let students look closely and reason out their responses, rather than discussing the facts. If a student comes to a factually incorrect conclusion, gently correct if absolutely necessary during your classroom lesson, *not* during the VTS conversation.
- Allow the conversation to go where it will, even if it gets off topic. Remember, the goal is not to share information, but to encourage critical thinking.
- At the end of the conversation, continue with your lesson, linking the content with comments that students made.

For more information about Visual Thinking Strategies, visit their website. Below is a video of VTS in action with first grade students (you can find more videos on the VTS site at this link).

Contact Us !

for Museums

VTS training and consulting can be tailored to meet the objectives of museum educators, docents or curators. Museum staff may choose to participate in one of our national training events, or a VTS trainer can work with a group of museum staff on location in your institution.

Contact us to inquire about the best fit for you or your museum.

For highlights of VTS museum programs throughout the country, click here. Or, read about some of the programs from our newsletter stories:

- The Rubin Museum of Art, New York
- The Everson Museum of Art, Syracuse
- The Indianapolis Museum of Art, Indianapolis
- The Tang Museum, Saratoga Springs
- The Frye Museum, Seattle

VTS is a strong component of many museum-based education programs, including:

- **Ball State University Museum of Art**
  Muncie, IN
  The BSUMA will develop and disseminate a third-to-sixth-grade standards-based language arts curriculum using works of art in the museum's collection using VTS.

- **Brattleboro Museum**
  Brattleboro, VT
  Brattleboro Museum & Art Center's education program is centered on VTS, which is used in all school visits and with all ages. The Museum brings changing exhibits of art of our time to its six galleries three times a year.

- **Fine Arts Museums of San Francisco**
  San Francisco, CA
  The Fine Arts Museums of San Francisco have rendered a century of public service in the arts, and it is our mission to extend that service into the next century. The FAMSF uses VTS for their 1st-3rd grade tours and the methodology also informs our work with upper grade levels.

- **Memphis Brooks Museum of Art**
  Memphis, TN
  The Memphis Brooks Museum of Art is the Mid-South's largest encyclopedic art museum as well as a center for cultural activity for the entire family. The Museum has piloted a VTS

collaboration with three inner city schools, beginning in 2008.

- **Provincetown Art Association and Museum**
  Provincetown, MA
  Since 1914, the Provincetown Art Association and Museum (PAAM) has distinguished itself as a vibrant center of 20th and 21st century art. PAAM utilizes VTS in a variety of educational programs and settings including: docent trainings and general tours facilitated by staff; the Student and Educator Curating Program; classroom environments K-12 utilizing work from our permanent collection; and out-of-school programming for children and youth.

- **The Wolfsonian-FIU**
  Miami, FL
  The Wolfsonian, Florida International University, an art & design museum located in the heart of the Art Deco District in Miami Beach, uses objects to illustrate the persuasive power of art and design, to explore what it means to be modern, and to tell the story of social, political, and technological changes that have transformed our world. Museum education staff use VTS primarily with K-12 and university students. School teachers are also trained to implement VTS in their classrooms.

for Schools

The VTS School Program is a school-wide, 3-year PD model and curriculum implementation for PreK-8 schools. Our model includes a mix of full-staff trainings, grade-level or content-area group debriefings, and classroom co-teaching sessions each year. Our professional development and curriculum model are sequential and developmentally-based to reflect students growth in critical thinking, language and art-viewing skills over time.

Contact us for more info on the VTS School Program.

Visual Thinking

2

Rudolf Arnheim

13 Reviews

University of California Press, 1969 - Art - 345 pages

"Groundbreaking when first published in 1969, this book is now of even greater relevance to make the reader aware of the need to educate the visual sense, a matter so harmfully neglected in the present system."--Peter Selz, author of *Nathan Oliveira*

Review: Visual Thinking

User Review - Damien - Goodreads

Absolute classic essays about cognitive and gestalt psychology. Terrifically appealing for visual artists that are interested in a scientific underpinning of how human cognitive powers operate ... Read full review

Teaching Museum - Vacancy Ad October 2014

Job ref: 39634
Position: Teaching Museum Manager
Organisation: Norfolk Museums Service
Location: UK, England, Norwich
Closing date: 05/10/2014 d/m/y
Job Type: C
Salary: £27,323 - £28,922 per annum

Details:

Teaching Museum Manager 630 CSTE
Norfolk Museums Service

UK, England, Norwich

Location: Shirehall Museum, Norwich
Salary: £27,323 - £28,922 per annum (Scale I)
Hours: 37 hours per week
Contract: Temporary contract/secondment opportunity until 31 March 2018

Norfolk Museums Service has established itself as the first Teaching Museum in the country along the lines of the existing model of teaching hospitals and schools. The aim is to support the development of a highly skilled and flexible workforce.

We are seeking a self motivated individual to lead the development and delivery of the programme building on the success of the programme to date.

The Teaching Museum Manager will be responsible for recruiting cohorts of trainees, devising a comprehensive development programme and advocating for the programme with stakeholders.

You will have strong project management skills, a track record of developing effective partnerships as well as practical experience of training, coaching and mentoring.

For an informal discussion regarding this vacancy please contact Jo Warr (Head of Development) on 01603 493665.

Closing date: 5 October 2014
Interview date: 17 October 2014
